De nieuwe nederlandse bloem-hof, ofte De zorgvuldige hovenier, onderwysende, hoe men allerhande soorten van de curieuseste bloemgewassen, als tulpen, angelieren, hyacinthen, narcissen &c. gelukkiglijk sal voortsetten, en veilig tegen 't verderf bewaaren, enz.; insgelijks ook een naaukeurige verhandeling, hoe men alle soorten van boomen sal saajen, planten, etc. Hier by komt nog den nieuwen neederlandsen Hesperides, of oeffening en gebruik van de limoen en orange-boomen, &c. Leyden, Gedrukt voor den uitgever, en zijn te bekoomen by Joh: du Vivié en Is. Severinus, boekverkopers, A°. 1700. 80, 45, 37, 51, 69 p. (Arn. Arb.)

Half-title: "De neederlandse bloem-hof, of De naauwkeurige bloemist &c."

Above imprint noted and book partly cataloged by MFW at the Arboretum in 1919. Arn. Arb. Cat. 1:530 gives full title as above, but omits names of printers.

There appears to have been only one issue under the original title of 1700. The 2d is entitled: "De neederlandsen (or nederlandschen) hof," which form was used for later eds. thru the 7th, 1792. In 1728, however, there was a 6th ed. entitled: "De naaukeurige bloemist of De nieuwe nederlandsche bloem-hof," and there is a 7th ed. also under this title, which may have appeared in still other issues.

----- De neederlandsen hof, beplant met bloemen, ooft, en oranjerijen; waar in geleerd werd, hoe men alderhande soorten van de curieuseste bloemgewassen ... sal voortkweeken, vermeenigvuldigen, nieuwe aanwinnen, wel en met verstand veilig teegen 't verderf bewaaren, enz. Insgelijks ook een naaukeurige verhandeling, hoe men alle soorten van boomen sal saajen, planten, vrugtbaar maaken en voortkweeken; mitsgaders de wijze om de selve regt en wel te snoejen; en soo altijd vrugtbaar te houden. Hier by komt nog den nieuwen neederlandsen Hesperides, of oeffening en gebruik van orange-boomen, &c. Alles door langwijlige ondervinding geschikt naa de climaat deser landen, ten gemeenen voordeel uitgegeeven, en oversien, ja by na een derde met nieuwe aanmerkingen vermeerderd door Henr. van Oosten ... Den tweeden druk. Leyden, Gedrukt voor den uitgeever, en zijn te bekoomen by Joh: du Vivié en Is. Severinus, boekverkopers, 1703. 286 p. (N. Y. Bot. Gard.)

Appended: "Register van alle de soorten der voornaamste vrugten ... door Hendrik van Oosten" (Leyden, 1703), 55 p.

Oosten, Hendryck van (cont.)

----- Den derden druk. Leyden, Gedrukt voor de uitgeever, en zijn te bekoomen by Joh. du Vivie, en Is. Severinus, boekverkoopers, anno 1715. 286 p. (Arn. Arb.; Brit. Mus.)

Imprint of Arn. Arb. copy noted by MFW but not given in full in Arn. Arb. Cat. Latter gives collation of 286, 55 p, evidently covering the "Register van alle de soorten der voornaamste vruchten" appended to the 2d ed., with which the 3d may be practically identical. (MFW)

----- Den vierden druk.

We can find no definite record of a 4th ed. of this book. Cat. Bib. Nat., under Du Vivier, Jean, gives an entry for "De nieuwe en naauwkeurige neederlandse hovenier ... De vierden druk. Leyden, J. A. Langerak, 1721," with 286 p., corresponding to the paging of the 2d and 3d eds. recorded above, and differing sharply from the 426 p. given by the Wageningen Alg. Cat. 7:242 for the 4th ed. of the same title with the same date. We think it possible that Langerak might have got out issues of both books in that year, with resulting confusion of titles and pagings. (MFW)

----- Vyfde druk. Leyden, 1726. (Brit. Mus.)

Title is condensed in Brit. Mus. Cat., but is evidently like that of the 2d and 3d eds.

----- De vyfden druk. Rotterdam, By Hermanus Kentlink, 1749. 318 p. (Arn. Arb.)

Imprint noted by MFW from Arn. Arb. copy; not given fully in Arn. Arb. Cat. The title appears to be the same as in the previous 5th ed. An ed. of the same title and date is also given by Bib. Hulthemiana, 1:432.

----- 6. druk. Rotterdam, 1784. 318 p. (Bib. Landb. Hoogesch. Wageningen)

Bradley Bib. 3:76 gives a 6th ed. with same place and date under the title: "De naaukeurige bloemist," but the entry of the Wageningen Alg. Cat. 8:256 is plainly "De nederlandschen hof." While there may have been several issues of some of these editions, it is probable that the Bradley Bib. and Wageningen Cat. refer to the same thing. (MFW)

Figure 1 is a map of the study area in the northern Adriatic. It shows the coastline from Trieste in the north to the Gulf of Genoa and Liguria in the south. A scale bar at the top indicates distances from 0 to 100 km. A legend identifies symbols for 'Sampling stations' (black dots), 'Coastline' (solid line), and 'Islands' (dashed line). The map shows the location of sampling stations along the coast and in the Gulf of Trieste.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was plotted against the number of trials for each condition. The number of correct responses increased with the number of trials for all conditions. The number of correct responses was highest for the condition with the highest number of trials (10 trials) and lowest for the condition with the lowest number of trials (2 trials).

----- 7. druk. Rotterdam, 1792. (Bib. Landb. Hoogesch. Wageningen)

Bradley Bib. also enters a 7th ed. with the imprint Rotterdam, 1792, under "De naaukeurige bloemist," but Wageningen Bull. Cat. IV (1930), no.11, item 22469, as well as Bib. Hulthemiana, 1:488, enter it as "De nederlandsen hof." Bradley Bib. also gives collation for this, 312 p. as in the "7. vermeerderde druk."

----- De naaukeurige bloemist, of De nieuwe nederlandse bloem-hof, beplant met bloemen, ooft en orangeryen. 6. druk. Leyden, J. A. Langerak, 1728. (Nijhoff, Cat. 528, item 81; Miltitz, col.301)

----- 7. vermeerderde druk. Amsterdam, Bij W. Brave, junior [n.d.] 312 p. (Dept. Agr.)

The date of this issue cannot be found. Its title is similar to that of the 6th ed. quoted by Nijhoff with imprint, Leyden, J. A. Langerak, 1728, from which it may have been reprinted. 5th, 6th, and 7th eds., however, had been published at Rotterdam after that date, suggesting a possibility that this may be subsequent to the 7th, 1792. ----- [English] The Dutch gardener: or, The compleat florist, containing, the most successful method of cultivating all sorts of flowers: the planting, dressing, and pruning of all manner of fruit trees. Together with a particular account of the nursing of lemon and orange trees in northern climates. London, D. Midwinter and T. Leigh, 1703. 291 p. (Dept. Agr.; Arn. Arb.; Mass. Hort. Soc.; Brit. Mus.)

For a particular discussion of this English version see E. A. Bunyard, "Henry van Oosten and 'The Dutch gardener,'" Jour. Pomol. 1:37-40, 144 (1919-20). Bunyard compares this with Evelyn's translation of La Quintinie (1693), suggesting that the translator of "The Dutch gardener" may have borrowed some of Evelyn's phraseology.

----- London, 1707. (Lindley)

The date 1707 is not confirmed by other bibliographies and may be a misprint.

As indicated by the title and division of the contents into separate books, this is a direct translation of "De neederlandsen hof" (Leyden, 1703).

----- Wolffenbüttel, 1712. (Dultz, Ant.-Kat. 38 (1920), no.860; Seguiet, Bib. Bot., p.386)

----- Magdeburg, 1728. (Miltitz, col. 295)
The existence of this ed. is open to doubt. There actually was a 4th German ed., published Wolffenbüttel, 1728, and there may have been a 3d between 1712 and 1728. There is a similar gap, however, between the 3d Dutch ed., 1715, and the 5th, 1726. (MFW)

----- 5. aufl. Wolffenbüttel, J. C. Meissner, 1751. (Lib. Cong.; Kat. Landb. Bib. København (1898) p.597)

København Kat. brackets 305 p., which corresponds to the sum of the individual pagings of the preceding ed. Lib. Cong. gives sum of pages as 334 p., which doubtless includes unnumbered pages. Miltitz gives place of publication of 1751 ed. as Leipzig.

----- 5. aufl. Leipzig, Bey F. Schneidern, 1791. 79, 30, 44, 84, 68 p. (Dept. Agr.)

The title and collations indicate that the German version was reissued with little change down thru this 5th edition. (MFW)

Leide, Jean du Vivier, 1714. 392 p. (Dept. Agr.; Arn. Arb.; Brit. Mus.; Bib. Nat. Paris)

Van Oosten's name is not found in the French version, which is credited by Barbier, Dict. Ouvr. Anon. 2:981, to Jean du Vivier, the publisher of this as well as the original Dutch edition. This attribution is accepted by Gibault, Étude (1905), p.724, and the work is entered under du Vivier in Cat. Bib. Nat. Paris, Brit. Mus. Cat., & Pritzel, 1st ed. Miltitz, col.295, gives 1721 ed. under Oosten, but in col.297 gives 1714 ed. under Vivier. Seguier, p.408, treats the work as anonymous. Du Vivier may have been the French translator, and at any rate was responsible for this edition, which he dedicates to "Abraham Bisschop, fameux marchand, a Galata," signing himself "Votre très humble & très obéissant serviteur & cousin J. du Vivier."

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand the preferences and behaviors of potential customers. Once a need is identified, the next step is to develop a concept that addresses this need. This concept should be unique, feasible, and profitable. The third step is to create a prototype of the product. This allows the company to test the concept and make necessary adjustments before moving forward with production. Finally, the product is launched into the market, and the company monitors its performance and customer feedback to ensure long-term success.

Register van alle de soorten der voornaamste vrugten, als van abricosen, persiken, karssen, pruimen, kruisbessen, aalbessen, peeren, appels, queepeeren, wijngaarden of druiven, en mispelen. Dito een register van alle de saaden, behoorende tot de moetuinery. Sijnde het selve ten hoogsten nut en dienstig voor alle liefhebbers van hooven en tuinen. Na langduurige ervarentheid te saamen gesteld door Hendrik van Oosten, entenier tot Leyden. Leyden, Gedrukt voor den uitgeever by Joh. du Vivié en Is. Severinus, 1703. 55 p. (With Oosten, Hendryck van. De neederlandsen hof. 2. druk. Leyden, 1703) (N. Y. Bot. Gard.)

Altho the Arn. Arb. Cat. does not mention the "Register" in its entry for "De nederlandsen hof," 3d ed., 1721, it gives a collation of 286, 55 p., implying that this is precisely like the 2d ed., and like it, contains the "Register," which may or may not have a new title and date.

It seems possible that the anonymous "Vermeerderd en vernieuwd register van meest alle de soorten van peeren en appels," 2d ed., 1721, and 3d ed., 1752, may be related to Van Oosten's "Register." The 2d ed. has 56 p., and both are in the Arn. Arb. Cat. (MEW)

Palissy, Bernard (1510?-1590)

His works include many agricultural topics: soils, their mineral constituents, adaptations to certain crops, etc., as for instance a vine of Saintonge called "Chanchetz", cited by Roy-Chevrier, p.13, which Palissy in his "Chapitre des sels divers" mentions as adapted to saline soils.

His "Jardin delectable" is discussed by MM. Bois and Gibault, Jour. Soc. Nat. Hort. France (1895), p.309-312, as the earliest presentation of picturesque gardening in France, and is quoted by Sieveking (1899), p.46-50. The "Dessein du jardin delectable" is part of his "Recepte veritable, par laquelle tous les hommes de la France pourront apprendre à multiplier et augmenter leurs thresors", originally published at La Rochelle, 1563. It is reprinted in "Les oeuvres de maistre Bernard Palissy. Nouv. éd. rev. par B. Fillon" (Niort, L. Clouzot, 1888), v.1, p.69-104. (Dept. Agr.). It has also been translated into English by Helen M. Fox, with title: "A delectable garden" (Peekskill, N. Y., Watch Hill press, 1931). (Lib. Cong.)

His works include many agricultural topics:
soils, their chemical composition, adaptation
to certain crops, etc., for instance a volume
of "Méthode de culture" (1816), cited by
Gavetier, p. 11, which says: "C'est

His "Jardin delectable" is discussed by

(1816), p. 307-312, as the earliest presentation
of picturesque gardening in France, and is quoted
by Gavetier (1816), p. 118-119. The "Jardin

Mentioned by Gibault, Jour. Soc. Nat. Hort. France (1905), p.738. Bouchard-Huzard (1870), p.978-979, lists several collections of garden plates, tho none so early as the above; and he mentions earlier works by Panseron, 1772-1780, containing 168 plates, among which garden ornaments, etc., are included. The following collections are noted by Bouchard-Huzard:

Recueil de jardinage. Paris, l'auteur, 1783. 2 v.

Jardins françois, 28 pl.; jardins anglois et chinois, 28 pl.

Recueil de jardins anglois et chinois. Paris, l'auteur, 1783. 4 v. 145 pl. without text.

Brit. Mus. Cat. gives date 1674, which is evidently an error, as 1774 is confirmed by Lastri, p.97; Re, 3:221; and Dultz, Ant.-Kat. 38, no.1067.

Four pages of text with figure of tool used in transplanting tulips, occasionally found in Dutch editions of the "Hortus floridus". Gives list of 77 tulip amateurs, as compared with 32 listed on verso of title of "Hortus floridus". See Savage, Spencer, "A rare early tract on tulip growing". Gard. Chron. (3) 73:31 (Jan.20, 1923). This leaflet has not been located, either in its Dutch or its French form, in any American library. (MFW)

See Savage, in Gard. Chron. (3) 73:31 (Jan. 20, 1923). Consists of 4 p. text with figure of transplanting tool, sometimes found with French version of "Hortus floridus", and slightly different from the Dutch: "Een cort verhael van de tulipaenen", which is similarly found with the Dutch text of the "Hortus floridus". Hortus floridus in quo rariorum & minus vulgarium florum icones ad vivam veramq^B formam accuratissime delineatae. Et secundum quatuor anni tempora divisae exhibentur incredibili labore ac diligentia Crisp. Passaei junioris delineatae ac suum in ordinem redactae A^o. 1614. Arnhemij, apud Joannem Janssonium [1614] (Mass. Hort. Soc.; N. Y. Bot. Gard.; Brit. Mus.; Lindley Lib.)

Dates are variously given as 1614-17. Copy in Mass. Hort. Soc. has Latin and French text; descriptions facing plates are in Latin, but "Description des couleurs des quatre saisons" (p.[2-25]) is in French. It has added title in French: "Jardin des fleurs, contenant en soy les plus rares et plus excellentes fleurs". A copy with French title was offered by Nourry, (Paris), Cat. 41, no.316, with imprint: Utrecht [1614]

The following give bibliographical details about this work and its various editions:

The "Altera pars" of the "Hortus floridus", with above half-title, is quoted by Pritzel as a separate work with 62 pl., i.e. engr. title and 61 pl. Mo. Bot. Gard. copy is complete; that of Lib. Cong. has only 53 pl. and title.

Both Seguiet and Pritzel enter under "Passeratus", but he is evidently the "Jean Passerat" of the Brit. Mus. Cat. Seguiet says he died in 1602, aged 73 years.

Pein (Peine, Peinel, Peinen), Elias (fl.1690-1713), gardener to Kaspar Bose in Leipzig.

Name variously spelled by different authorities; Pritzel and Seguiet give it "Pein"; Brit. Mus. has "Peine"; "Peinen" is an oblique case, and the other probably mere error. No copy of the "Pfropf- pflanz- und gartenbüchlein", which is credited to Pein by Haller, has been traced; and the discovery of the same title of slightly later date as an anonymous work suggests that, even if it is actually by Pein, it may not contain his name. It also seems likely that his works may have served as the basis of those of Johann Ernst Probst, who was in charge of the Bose gardens a generation or so later. (MFW)

Pritzel, 1st ed., and Seguiet, p.136, give German title only, without "Hortus Bosianus"; Haller, 1:646, uses the latter title, which is that of subsequent editions.

Peiresc, Nicolas Claude Fabri de (1580-1637)

A patron of the arts and sciences, who introduced many rare plants into Europe thru his gardens at Aix in Provence. Correspondent of Clusius, Gui de la Brosse, Vespasien Robin and other botanists of his time. The genus PEIRESKIA named for him; see Monatsschr. Kakteenk. 20:23-24 (1910). His biography by Gassendi contains many notes on plants that were received or distributed by him, and a review of the "Lettres de Peiresc" (1886-98) by Emile Michel, in Rev. Hort. Belg. et Étrang. 26:196-198 (1900), gives a further idea of Peiresc's interest in plant introduction and acclimatization. The following sources of biographical information have been noted:

Gassendi, Pierre (1592-1655)

Viri illustris Nicolai Claudii Fabricii de Peiresc. Parisiis, sumptibus S. Cramoisy, 1641. 405 p. (Bib. Nat. Paris; also other eds.)

--- ----- The mirrour of true nobility and gentry, being the life of the renowned ... lord of Peiresk. Englished by W. Rand. London, 1657. (Lib. Cong.; Brit. Mus.)
Quoted by Sieveking (1898), p.90-91. The references to cultivated plants and gardens in this ed. have been extracted on separate sheets.

Petit, Samuel (1594-1637)

Lettres inédites, écrites de Nîmes et de Paris, à Peiresc (1630-1637). Mém. Acad. Nîmes, Sér.7, t.9, p.271-275. Nîmes, 1887. (Lib. Cong.)

Tamizey de Larroque, Jacques Philippe (1828-1898), ed.

Lettres de Peiresc, publiées par Ph. Tamezey de Larroque. Paris, Impr. Nat., 1886-98. 7 v. (Scattered parts)

There is some confusion about the title; one record gives "Les Correspondants de Peiresc" (1886-98), which appears to have been issued in 23 pts., Harvard having pts. 2-6, 8, 10-23, bound in 3 vols. Larousse du XXme siècle, 6:583 (1933), mentions only the "Lettres", not giving the title "Correspondants". Incomplete sets of the "Lettres" are located in Crerar (v.3,4,7) and N.Y. Pub. Lib. (v.1-5,7). It suggests itself to MFW that if the latter portion of the series was devoted to the letters written to Peiresc, there may have been a subtitle, "Correspondants", which the Harvard Library may have used, as it has chiefly the later parts.

Perrot, Cathérine

Les leçons royales, ou La manière de peindre en miniature les fleurs et les oyseaux, par l'explication des Livres de fleurs et d'oyseaux de feu N. Robert fleuriste. Paris, Nego, 1681. 231 p. (Pritzel, 1st ed.)

----- Paris, 1686. (Brit. Mus.)

Brit. Mus. Cat. enters under "Horry, Catherine", with reference from Perrot; but latter is form of name used by Lib. Cong., which has card for her "Traité de la miniature" in v.6 of Feli-bien, André, "Entretiens sur les vies et sur les ouvrages des plus excellens peintres" (Trevoux, 1725) (MFW)

Garten-ordnung, darinnen deutliche wahrhaftige beschreibung, aus rechtem grund der geometrie u.s.w. sowohl zu saeen, als zu pflanzen, & auch wein- und rosen-gänge, und insonderheit mancherley zierliche und lustige labyrinth gross und klein nach gelegenheit aines jeden orts und platzes anzurichten: item wie bäume ordentlich ad quincuncem zu setzen, und was mehr zum gartenwerk gehörig ... Hiebei ist auch ein gründlicher und bewerteter bericht, wie die bäume und andere gartengewächse zu warten u.s.w. Eissleben und Leipzig, 1597. 138 p. F^o.

Recorded by Boehmer, 3(1):675; Burchardt, 16:59; Haller, 1:391; Miltitz, col.286. Advertised by Karl Max Poppe, Ant.-Kat.41(1929), no.4568, at a price of Mk.180.

Verz. Gartenb. Ver. Darmstadt angehörigen Bücher (1875), p.23, gives "Peschelius, Garten-ordnung. 1500". This must be an error, as all other authorities agree on the date 1597. The Darmstadt copy may actually have been 1597 ed., or there may have been a reissue of 1600, which might easily have been entered with an error of one figure in the date. (MFW)

Piccioli (or Picciuoli), Giuseppe (d.1828?)

Calendario del giardiniere fiorista. Venezia, Grazi-
osi, 1792.

Noted in Mém. Agr. Soc. Agr. Dép. Seine, 11
(t.39):cxlij (1808). Listed among the works of
Lastri, and said to be "by the same", but cred-
ited to Piccioli in Lastri's "Corso di agricul-
tura", ed.3, 1801. It is not certain whether
this is the 1st ed., as according to the pub-
lisher's preface in the following, the "Calen-
dario" had been twice reprinted before 1797,
but no issue prior to 1792 has been located.

----- (In his: La cultura de' fiori e degli ananassi
senza stufa. Firenze, 1797, pp.76-100) (Dept. Agr. &c)

----- (In: Lastri, Marco Antonio. Corso di agricoltura.
Ed.3, v.2, p.70-84. Firenze, 1801) (Lib. Cong.)

Note at end states that these instructions
have not been gleaned from Italian and foreign
books, but result from the practical knowledge
of Sig. Giuseppe Piccioli, formerly gardener at
the Boboli, and previously at La Loggia. It has
been included with other works of Piccioli as
in the preceding, and he may presumably be ac-
cepted as its author.

Piccioli (or Picciuoli), Giuseppe (d.1828?)

Calendario del giardiniere fiorista. 1st ed. unknown.

According to the publisher's preface in the following, the "Calendario" had already been reprinted twice before 1797, but the date of the original issue has not been discovered. (MFW)

----- (In his: La cultura de' fiori e degli ananassi senza stufa. Firenze, 1797. p.76-100) (Dept. Agr. &c.)

----- Venezia, Graziosi, 1792. (Not located)

Noted in Mém. Agr. Soc. Agr. Dép. Seine, 11 (t.39):cxlij (1808). Given among works of Lastri, and said to be "by the same", but credited to Piccioli in the former's "Corso di agricoltura" (Ed.3); see above. (MFW)

La cultura de' fiori e degli ananassi senza stufa ... Nuova ed., accresciuta e corretta dall'autore. Firenze, Preso A. G. Pagani e comp., 1797. 103 p. (Dept. Agr.; Lindley; Cat. Bib. Min. Agr. Italy, Sup.2 (1898), p.338)

Altho this is called a new ed., there was no previous one under the title. Ragionieri, Gard. Chron. (3) 82:28 (July 9, 1927), calls this 4th ed., i.e. of the "Metodo di fare le sementi de' fiori". The publisher's preface of this 1797 ed. (p.3-4) states that the "Metodo" has been reprinted no less than four times, and the "Calendario del giardiniere fiorista" twice; but they are already rare, as well as the "Memoria sulla cultura degli ananassi", issued as an appendix to the "Hortus Panciaticus" (1783). Inasmuch as the present work is a new ed. of all three, and issued under an entirely new title, it is more convenient to treat it independently. (MFW)

Metodo di fare le sementi de' fiori, ed in particolare quella de' garofoli, con la maniere di potere avere per mezzo di seme dei fiori doppj e di rara bellezza. Firenze, Piatti, 1780. (Not located)

Name of printer from Niccoli, Saggio (1902), p.320, with revised spelling of Niccoli's title.

Noted by Hirschfeld, Garten-Kalendar, 1782, p.64, as "Memoria distesa da Giuseppe Piccioli ... letta nell' Accademia dei Georgofili nella sezione da essa tenuta il dì 16. febbrajo 1780". Hirschfeld says this consists of "2 bogen" (24 pages?), and gives contents in German: "Wie man selten gefüllte blumen, vornemlich nelken, aus dem saamen ziehen soll". As the latter is a fairly close rendering of "Metodo di fare le sementi" &c., it bears out the assumption that this is the main title, and "Memoria distesa" a caption, as was the case with the reprint of 1792. Moreover, the title "Metodo" &c. is the one used in subsequent editions.

Re, Diz. Rag. Lib. Agr. 3:142, implies that the memoir presented by Piccioli before the Accademia dei Georgofili was originally published in the "Magazzino Toscano", and gives no hint of a separate issue in 1780. (MFW)

Methodo di fare la semenza di erba di Sant'Antonio
La semenza di erba di Sant'Antonio si fa in
modo seguente: si prende un moggio di erba
di Sant'Antonio, e si taglia in pezzi
piccoli, e si mette in un sacco di
canevas, e si batte con un bastone
di legno, e si straccia la semenza
fuori del sacco, e si mette in un
cubo, e si lava con acqua, e si
asciuga al sole, e si mette in un
sacco di canevass, e si conserva
per l'uso.

Plat, Sir Hugh (1552-1611?)

Delightes for ladies to adorne their persons, tables, closets, and distillatories with beauties, banquets, perfumes and waters. Reade, practise and censure. London, 1602. 18°. (Nymans Lib.; Rohde, E. S. *The Old English Gardening Books*, p.32-36; Lowndes, W. T. *The Bibliographer's Manual of English Literature*, v.4, p.1880)

E. S. Rohde, l.c., says that this small still-room book has always been a prized Elizabethan gardening item. On every page is a woodcut border of violets, roses, gilliflowers, marigolds, or conventional designs of the Tudor rose and fleur-de-lis of France, or the letters E. R. for Queen Elizabeth. In an article on the Nymans library, *Jour. Roy. Hort. Soc.* 58:337 (Sept. 1933), Miss Rohde describes a copy that once belonged to James I. Lowndes, l.c., lists eds. of 1602, 1609, 1611, 1617, 1628.

Floraes paradise, beautified and adorned with sundry sorts of delicate fruites and flowers, by the industrious labour of H. P. knight. London, H.L. for W. Leake, 1608. (Brit. Mus.)

Johnson, p.70, gives "The Paradise of Flora, 1600", but 1608 is the earliest date indicated by Lady Cecil, p.337; Haller, 1:405, & others. Johnson says "The Garden of Eden is the same as the Paradise of Flora, with the mere alteration of the title, by a Mr. C. Bellingham, a kinsman of Sir Hugh's. The second part of the Garden of Eden is entirely a composition of Bellingham's".

James Earl Ray, a white male, born January 19, 1928, in Jackson, Mississippi, was arrested on January 16, 1969, in London, England, on charges of the murder of Dr. Martin Luther King, Jr. He was charged with first-degree murder and possession of a firearm. He was held in custody at the London Police Station and later transferred to the Prison for Women, Holloway, London. He was charged with the murder of Dr. Martin Luther King, Jr. on April 4, 1968, in Memphis, Tennessee. He was charged with first-degree murder and possession of a firearm. He was held in custody at the London Police Station and later transferred to the Prison for Women, Holloway, London. "The second part of the garden of Eden ... Never before printed. London, Printed for W. Leak [sic] 1660" (159 p.)

The British Museum has copies of both 1659 and 1660, treating the latter merely as another copy of the former. It appears, however, that the "Second part of the Garden of Eden" first came out in 1660, with the 5th ed. of the original, issued with the same date. According to Johnson, p.70, the "Second part" was entirely written by Charles Bellingham.

Robinson Cat. 52, 340. gives volume in 2 pts. with separate title (1657-1660) which are said to be 5th ed. of pt. 1 and 1st ed. of pt. 2. This would be the same as the 2 volume ed. in the 1660 book.

Platina (cont.)

Georges Vicaire, "Bibliographie gastronomique" (1890), col. 687-688, gives a very complete list of editions of Platina, including the incunabula. The following early German versions may be of interest, possibly connected with the "Lustgärte und Pflantzen" (Augsburg, Steyner, 1530, 1531)

----- [German] Von allen speisen und gerichten &c. Wie man sie allerhandt art, künstlich und wol kochen, einmachen und bereyten sol. Plinius Caecilius Secundus, Caius (62-116)

Two letters of Pliny the Younger (ii,17; v,6) in which, according to the Encyclopaedia Britannica, 11th ed. (1911), "he elaborately describes his Laurentine and his Tuscan villa", are of interest here. M. L. Gothein, *Geschichte der gartenkunst*, 2. Aufl., 1:104-112 (1926), describes at some length the "Tusci", typifying the plan of the Roman villa, and briefly refers to the "Laurentinum".

Among English translations of Pliny's letters, the one by William Melmoth (London, 1746), has had numerous editions. Sieveking, p.15-18, quotes from this the letter to Apollinaris (v, 6) on his Tuscan villa.

There are almost innumerable editions of the letters, and commentaries on them, but the following titles relate especially to the topic of Pliny's villas. (J.S.D.)

Pliny's two epistles (ii, 17; v, 6) containing an exact description of his villas Laurentinum and Tuscum: Latin and English, with large remarks. (In: Castell, Robert. *Villas of the ancients*, illustrated by the author. London, 1728. F°..) (Watt, Bib. Brit.; Bib. Nat. Paris)

Varie descrizioni di ville di C. Plinio Secondo, nuovamente tradotte nella lingua volgare da A. Manucci [Aldus Manutius]. Roma, Per li Santi & Compagn., 1588. (Brit. Mus.)

Extracts from Pliny's epistles; edited by M. A. Abagaro.

Plinius Secundus, Caius (23-79)

His "Naturalis historia" (Editio princeps, Venice, 1469) gives valuable data on the vegetables, fruits and other economic plants of his time. Altho loosely organized and written in a discursive style, his notes are important for the history of cultivated plants. The work has had innumerable editions, with translations and commentaries in many languages. An English version by Philemon Holland, "The Historie of the World, commonly called the Naturall historie of C. Plinius Secundus" (London, Printed by Adam Islip, 1601, 2 v., F°), has been reprinted several times, and is the one quoted by Sieveking, "The praise of gardens" (1899), p.13-14. Pliny's books on agriculture were translated into Italian by the abate Placido Bordonì, under title: "Libri d'agricultura, tratti dalla storia naturale" (Venezia, G. Pasquali, 1800, 3 v.), several editions of which are in Bib. Min. Agr. Italy.

There is a useful edition of the "Histoire naturelle de Pline", with the Latin text and a French translation by Ajasson de Grandsagne on opposite pages (Paris, C.L.F. Panckoucke, 1829-1833, 20 v.). This has copious notes in French by various specialists. The portions relating to plants, including their medicinal and other uses, occupy lib.xii-xxv, contained in v.8-15 of this edition. (MFW)

Pluche, Noël Antoine, abbé (1688-1761)

His "Spectacle de la nature", 8 v., Paris, 1732-35, is a series of popular instructions for the young, vol.2 being on garden flowers, fruits and vegetables. The author's name probably does not appear in the title, as the work is often treated as anonymous, or the name is bracketed. No copy of all the volumes in first edition has been located, but there are numerous issues in French and English translations, also German and Dutch versions. (MFW)

[illegible]

The "Forest of the East" (1908-10) is a series of popular lectures for the young, Vol. 1 being on "The Forest of the East" and Vol. 2 on "The Forest of the East". The author's name is not given in the title, as the work is often treated as anonymous, or the name is bracketed. No copy of all the volumes is at present in the collection, but the first edition has been located, and is now in the collection. The first edition is in French and English versions, also German and Dutch versions. (1908)

Pontano, Giovanni Gioviano (Pontanus, Joannes Jovianus)

His "Horti Hesperidum libri duo" appears to have been first published at Venice, 1505 (Cf. Bradley Bib. 3:496), probably in his "Opera" (Venetiis, in aedibus Aldi, 1505), which may be the first edition of his collected verses. The Library of Congress has his "Opera omnia" (Venetiis, in aedibus Aldi, 1513-19). There is another edition, Venetiis, apud Aldum, 1533, and one Basileae, apud Cratandrum, 1536. Savastano, in his critical study of Pontano's work and times, in Ann. R. Staz. Sper. Agrumic. e Fruttic, Acireale, 6:77-98 (1922), mentions a modern edition of his "Carmina", edited by Benedetto Soldati (Firenze, Barberia, 1902)

There was also apparently a separate issue of "De hortis Hesperidum libri duo, quibus agitur de Citrio fructu et arbore", published Florentiae, Filippo Giunti, 1514 (Cf. Saccardo, 1:131; Seguiet, p.150; Haller, 1:257; Niccoli, p.316)

Güntz, 3:18-19, gives contents. Out of the 21 chapters, the 15th deals with garden tools and instruments.

Porta, Giovanni Battista della (1538?-1615)

Porta died Feb. 4, 1615, but there is uncertainty about the date of his birth. Saccardo, Bot. Ital. 1:132 (1895) and Surg. Gen. Cat. both give it as 1536; Cat. Brit. Mus. Nat. Hist. gives 1540; and Theodor Holm, Amer. Nat. 52:455-461 (1918), gives 1545. The last two seem too late, if we may trust the evidence of Porta's preface to the reader, in the English version of his "Magiae naturalis" (1658). Here he says: "If this work made by me in my youth, when I was hardly fifteen years old, was so generally received and with so great applause...I hope that now coming forth from me that am fifty years old, it shall be more dearly entertained." Altho this is not dated, it must have been translated from the first complete edition in twenty books, which was published in 1589. If the author was fifteen at the time of the original edition in 1558, the date of his birth must have been at least as early as 1543, and if he was fifty in or before 1589, it sets the date of his birth back to 1539 or earlier. 1538 is the date given by Pritzel, and it is also accepted by Eugenio Camerini, who discusses Porta as a dramatist in his "I precursori del Goldoni" (Milano, 1872). Both Pritzel and Saccardo mention among their sources: Duchesne, Henri Gabriel, "Notice historique sur la vie et les ouvrages de J.-B. Porta" (Paris, An IX. 383 p. Bib. Nat. Paris); Colangelo, Francesco, "Vita de G. B. Porta" (Napoli, 1818); and Meyer, "Geschichte der botanik," v.4, p.438-444 (1857); while Saccardo lists many additional references on Porta's life and writings.

Porta is best known for his "Magiae naturalis, sive De miraculis rerum naturalium libri IIII" (Neapoli, M. Cancer, 1558, 163 p., F°), which was long afterwards expanded and issued as "Magiae naturalis libri XX ab ipso autore expurgati et super-aucti" (Neapoli, apud H. Salvianum, 1589, 303 p., F°). This consists partly of unusual and marvellous facts, together with a quantity of superstitions and misconceptions about natural phenomena. Book II, ch.1-8 of the original publication, corresponding to Books 3-4 of the complete work, 1589, relate to garden plants and receipts for producing "freak" flowers and fruits. It is characterized by Gibault, in his "Etude sur la bibliographie et la littérature horticoles anciennes" (1905), as an extraordinary collection of absurd receipts, and may be sometimes referred to as a repository of garden superstitions. It seems unnecessary, however, to give here a census of its innumerable editions and translations into English, French, Italian, Dutch and German, as there is an extensive bibliography of the work in Duchesne's "Notice historique" (l.c.), and examples of various editions are to be found in many libraries.

Porta, Giovanni Battista della (1538?-1615)

Suae villae Olivetum, sive liber sextus. Neapoli, apud haeredes Matthiae Cancrini, 1584. 78 p. (Bib. Nat. Paris)

Re, Diz. Rag. Lib. Agr. 3:357, says that Porta's Villae libri XII was not at first published as a complete work, the Pomarium being issued in 1583, and the Olivetum in the following year.

Io. Baptistae Portae Neapolitani suae villae. Pomarium. Expecta propediem candide lector reliquos nostrae villae libros. Neapoli, apud Horatium Salvianum & Caesarem Caesaris, 1583 [1584] 323 p. (Arn. Arb.; Crerar; Harvard; Brit. Mus.; Bib. Nat. Paris)

Arn. Arb. gives date as 1583 [1584], which is probably correct for the other copies listed; Bib. Nat. and Crerar give 1583 as the imprint date and 1584 in the colophon.

Villae Io. Baptistae Portae ... Libri XII: 1, domus; 2, sylva caedua; 3, sylva glandaria; 4, cultus & insitio; 5, pomarium; 6, olivetum; 7, vinea; 8, arbustum; 9, hortus coronarius; 10, hortus olitorius; 11, seges; 12, pratum. Francofurti, apud A. Wecheli heredes, C. Marnium & I. Aubrium, 1592. 914 p. (Dept. Agr.; Brooklyn Bot. Gard.; Mo. Bot. Gard.; Brit. Mus.; Kew; Bib. Nat. Paris)

A collection of the precepts of the ancients regarding agricultural economy, and their knowledge about the plants included in this treatise. The author, however, has from time to time added something of his own. He accepts a great part of the prejudices which have hindered the progress of agriculture, with very little discrimination. -- Cf. Re, Diz. Rag. Lib. Agr. 3:258.

Two other studies, the 1980 and 1990, have been conducted. The 1980 study was conducted by the National Longitudinal Survey of the Youth (NLSY) and the 1990 study was conducted by the Panel Study of Income Dynamics (PSID). Both studies found that the rate of smoking had increased significantly since the 1970s.

The 1980 study found that the rate of smoking had increased from 1970 to 1980, and the 1990 study found that the rate of smoking had increased from 1980 to 1990. The 1980 study also found that the rate of smoking had increased among both men and women, and the 1990 study found that the rate of smoking had increased among both men and women. The 1980 study also found that the rate of smoking had increased among both whites and non-whites, and the 1990 study found that the rate of smoking had increased among both whites and non-whites.

These findings suggest that the rate of smoking has increased significantly since the 1970s, and that this increase has occurred among both men and women, and among both whites and non-whites. The findings also suggest that the rate of smoking has increased among both whites and non-whites, and that this increase has occurred among both men and women. The findings also suggest that the rate of smoking has increased among both whites and non-whites, and that this increase has occurred among both men and women.

The modern English fruit-gardener and practical wall-tree pruner. London, 1785.

Advertised in 1928 by H. G. Fiedler, 28:54, no.1533; cannot identify it in the histories of Johnson and Cecil, in Watt, Bib. Brit., or in Bradley Bib. It is not found in British libraries like Kew and Lindley. The title is reminiscent of some of Abercrombie's of about that period: "The British fruit gardener, and art of pruning" (1779), and "The complete wall-tree pruner" (1783). It seems possible this may be a garbled issue of some contemporary publication under the name of a book-seller or printer. Altho Watt does not give this title, he does give a "Preston, Robert", author of "Meditations on the seasons, spring, summer, autumn and winter" (London, 1773), who might be identical with the author of this work. [Rasche, T. Christoph]

Die kunst, nelken zu ziehen, und ihre schönheit zu beurtheilen. Nürnberg, Haufe, 1777. (Hirschfeld, Gart. Kal. 1782, p.55; Kayser, 3:445)

Hirschfeld considers this anonymous, but credits to Rasche; Kayser has main entry under title, but refers to it from name of Rasche, Johann Christoph (d.1805). It seems doubtful, however, whether the latter could have been the author of the above, as none of the many other works listed under his name indicate interest in or knowledge of gardening on his part. (MFW)

Rasciotto, Donato

Copia del fiore et frutto, che nasce nelle Indie Occidentali, qual de novo è stato presentato alla santità di N. S. P. Paolo V. Venetia, 1609. 1 leaf, col. illus. (Brit. Mus. Nat. Hist.)

Not confirmed by bibliographers. Pritzel, 1st ed., no.8359; Saccardo, 1:135; Bradley Bib. 1:470; all give a very similar title, pub. at same place and date, but with "Indie Oreintali" instead of "Indie Occidentali". These authorities also give author's name as "Rasciotti" and Saccardo gives his forename as "Domenico". TV

Added title: "Flora, Ceres & Pomona". Some copies show variations in imprint. Cardiff [Wales] Public Library, "Catalogue of early works on botany, agriculture, and horticulture, exhibited in connection with the Royal agricultural show" (1919, p.20), gives it as "Printed by J. Reichart (Reichard, or Reichardt), Christian (1685-1775)

Güntz, Handb. Landw. Litt. 2:205, gives his dates as 1675-1774; but Kayser, Bücher-Lexikon, 4:459, says he died July 30, 1775. The dates 1685-1775 also appear on a portrait of Reichart used as frontispiece to Der Teutsche Obstgärtner, v.21 (1804). His surname is variously spelled, but is "Reichart" in the "Lebenslauf" written by himself, appended to his "Land- und garten-schatz", Ed.4, "Anhang", dated 1774.

Land- und garten-schatzes erster [-sechster] theil. Erfurt, J. H. Nonne, 1753-55. 6 v. (Kat. Landb. Bib. Kopenhagen (1898), p.421; H. E. Horton)

v.1-4 pub. 1753; v.5-6 have imprint: "J. H. Nonnens sel. wittib., 1754 [-1755]"

For descriptions and contents of this 1st ed. see Güntz, Handb. Landw. Litt. 2:205-207.

The main paging of volumes in the 3d & 4th eds., Erfurt, 1771-77, is the same as in the 1st ed., 1753-55; and most of the volumes of the later ed. have preface dates corresponding to the year of publication of the earlier ones. It is likely that the work was reissued to the end of the century without change except the addition of the "Universal-register" in 1762, and the "Anhang" in 1774. The so-called 5th ed. with title: "Deutschlands gartenschatz", 1802-03, and the 6th ed., 1819-21, were, however, largely revised. (MFW)

Bradley Bib. 3:121, gives dates 1771-78 for this ed.

Dochnahl, p.126, and Bradley Bib. l.c., give a 4th ed. in 4 v., 1774-76.

Dochnahl does not give this under Reichart, but as a distinctive work under its title, on p.53. It seems likely, however, that it is no less related to the original "Land- und gartenschatz" than the 6th ed., 1819-21. Bradley Bib. calls this the 5th ed.; but it is not numbered by Kayser.

Pritzel, 1st ed., no.8539, gives different title, probably quoted from Cat. Bib. Rivinus, and possibly confused with that of some later ed. Title as above, with imprint and paging, is taken from Anderegg, Bib. Schweiz. Landeskunde, Landwirthschaft (1895), p.463-464, and confirmed by other authorities. Brit. Mus. Nat. Hist. Cat. gives paging for pt.3 only, that of pts.1-2 presumably being overlooked. Since the paging of pts.1-2 is practically identical in all, one may infer that the original work was merely reissued in 1650, 1651 and 1669, with addition of "Das vierte buch. Von den sechs ersten monaten", in 114 p.

Copies of the 1st ed. have been offered by Gustav Focke, Ant.-Kat. 615, no.3295, and by L. Rosenthal of Munich, in letter Dec. 1926.

"Extracts from the literary and scientific correspondence of Richard Richardson", ed. by Dawson Turner (Yarmouth, 1835), gives interesting data on Richardson's collection of plants and plant introduction in that period, also a good many data on little known botanists and gardeners of the time.

De cultu hortorum ad populares suos carmen. Londini, apud Joannem Nutt, 1699. 24 p. (N. Y. Bot. Gard.; Brit. Mus.)

The date 1669, given for this work in Johnson, Hist. Eng. Gard., p.114, is obviously incorrect. Haller, 2:46, and Lady Cecil, after Watt, Bib. Brit., give 1699. In the "Extracts from the ... correspondence of Richard Richardson", l.c., p.275, there is a letter from Philip Miller (Aug.19,1727), who had just read the book and had written the author to ask how he might procure a copy. It must have been very rare, for Dawson Turner, editor of the correspondence, had been unable to find a copy, and save for Miller's allusion could find no mention of it except in Haller, 2:46, where the place of publication is given as Leyden.

His book, "The farmer", is of little value in connection with gardening, altho it contains brief instructions on cultivation of vegetables and flowers. It is of interest, however, on account of the uncertainty and obscurity of its editions. For more extended comment on their dates see: "Ringsted's works", by M. F. Warner, in Agricultural Library Notes, v.1, no.12, p. 153-154 (Dec. 1926)

The farmer. London, J. Dixwell [1775?] (N. Y. Pub. Lib.)

Contains advertisement of Ringsted's "Cattle-keeper's assistant", which was first published in 1774, according to Watt, Bib. Brit. Probably one of the earliest, if not the first ed., for it was issued by Dixwell, who also published a 9th ed. of the "Cattle-keeper's assistant" in 1776.

----- London, 1796. 166 p. (Rothamsted)

Possibly the 3d ed., which, according to Watt, Bib. Brit., was published in 1796; but there may have been an earlier issue of this ed., for it is listed among publications of J. Smeeton, in an appendix to a nursery catalog of John Graefer that has its preface dated 1794. (MFW)

This report is a summary of the work done by the
committee on the subject of the "National
Council on the Arts" during the year 1964.
The committee was organized in 1963 and has since
that time been working on a number of projects
designed to improve the status of the arts in
the United States. The committee has held several
public hearings and has received many suggestions
from artists, educators, and the general public.
The committee has also conducted extensive research
into the various problems facing the arts and has
developed a number of recommendations for the
federal government.

The committee has also been working on a number of
other projects, including the development of a
national system of arts education, the
establishment of a national council on the
arts, and the creation of a national
commission on the arts.

Dates from Kirschleger, Flore d'Alsace, 2: xcvi. His "Aurantiorum, citreorum, limonum-que malorum catalogus" (1747) appears to exist only as supplement to Thran, Christian, "Hortus carolsruhanus" (Loeraci, 1747), q.v. It is separately noted, however, by some bibliographers. Seguiet, Sup., p.33, and Pritzel, 1st ed., no.8594, indicate Risler as author of the "Ser. marchionis & principis Bada-Durlacensis Hortus carolsruhanus" (Loeraci, 1747); but according to Haller, 2:266, this was a new ed. of Thran's "Index plantarum horti carolsruhani tripartitus", first pub. 1733, with Risler's appendix on citrus fruits and a preface by him. The author is sometimes confused with the following: Nicolas Robert, the engraver; but as he is supposed to have died about 1684, above work could scarcely have been his.

Robert, Nicolas (c.1600-1684?)

See Michaud, Biog. Univ. 38:206-210 (1824). Miniature painter and engraver. Employed Blois (st) by Gaston d'Orléans, at same time with Brunyer, Morison and Marchant, the botanists. After the death of Gaston, Robert entered the service of Louis XIV. The Académie des Sciences sponsored a "Projet de l'histoire des plantes", the plates of which were drawn by Robert and engraved under direction of Abraham Bosse, with descriptions by Nicolas Marchant. The "Figures des plantes", 39 plates, with frontispiece and vignette by Sébastien Leclerc, form Pt.II of the work, issued in 1676. These plates were later reduced in size, for insertion in the Mémoires of the Académie, where they lack the soft quality of the originals. This collection of engravings of plants was continued after the death of Robert by Louis Chastillon, and completed 1692. The list of 243 species given by Segulier, Bib. Bot., p.160-168, is incomplete; but A. de Jussieu gives a full account of the collection in Mém. Acad. Paris, 1727. For additional information on the various editions of these plates see Brit. Mus. Nat. Hist. Cat. 4:1515; Brunet, 4:73. The main entry in the present bibliography for the "Recueil de plantes" is made under Bosse, Abraham, q.v.

Robert, Nicolas (cont.)

Nouveau livre de fleurs, feuilles et oyseaux, dessinés et gravés d'après le natural. Paris, 1680. 27 plates. (Hermann, Cat.127, item 367)

Hermann, l.c., says "Gravés par N. R." (i.e. N. Robert). The date 1680 is that indicated by Wheldon & Wesley, Illus. Cat., n.s., 6, no.111, as that of a collection of "Variae ac multifor-
mes florum species" with 70 plates; is it possible that a copy of the latter might have been bound with one of the "Nouveau livre"? Their combined plates, with title-pages, etc., would total about that number of plates. (MFW)

There is a "Livre nouveau de fleurs et d'oiseaux dessinez et gravez d'après nature", with 24 engravings, published Paris, Jollain, 1688, in the Brit. Mus. No attribution is given, but the similarity in title and closeness in date rouse the suspicion that it may be another issue of above engravings by Robert. (MFW)

Variae ac multiformes florum species expressae ad vivum et aeneis tabulis incisae ... Divers fleurs dessinées et gravées d'après le naturel par N. Robert. Paris [1660?] 30 pl. and engr. title. F°. (Brit. Mus. Nat. Hist.; Lindley; Linn. Soc. London; Brit. Mus.?)

Cat. Brit. Mus. Nat. Hist. 4:1712, supplies the bracketed date [1660?], which is followed by Cat. Lindley Lib. Linn. Soc. Cat. does not indicate the date. Another copy with bracketed date [1670] is given in Brit. Mus. Cat.; this appears to agree with entry in Jackson, Guide Lit. Bot., p.29, but is probably same as above. In 1923 Wheldon & Wesley, Illus. Cat., n.s., 6, item 111, offered a work with above title, consisting of 70 copperplates and engraved title, with imprint: "A Paris F. Poilly excudit rue St. Jacques à l'image St. Benoist", for which the supposed date 1680 was given in brackets. Seguiet, Bib. Bot., p.168, also gives the imprint: "Parisiis, apud Fr. Poilly", for a collection of 31 plates without date. While there may have been more than one issue by F. Poilly, it is likely that all these Paris eds. are the same. None have a date, and all save one have 31 plates (or 30 pl. & engr. t.-p.). It seems to MFW that the copy offered by Wheldon & Wesley with 70 plates may have comprised, in addition to those actually by Robert, certain series of plates published by Giovanni Giacomo de Rossi (Ioannes Iacobus de Rubeis) of Rome, who actually reissued the "*Variae ac multiformes florum species*" in 1665, and some of whose plates often occur in copies of the latter ed., q.v. Inasmuch as Rossi's ed. is plainly dated 1665, the original ed. of Robert's plates must have preceded it; hence the date [1660?] is provisionally accepted as that of the first issue. A further complication in regard to this work arises from the fact that Robert's plates themselves are not original, but are redrawn in reverse from those of Francesco Curti, "*Ad vivum exprimebat Franciscus Curtus*", 32 plates with engraved t.-p. supposed to have been published at Bologna about 1640. See also in the present bibliography, Curti, Francesco. (MFW)

----- Romae, aeditae a Io. Iacobo de Rubeis, 1665.
30 pl. & engr. title. F°. (Dept. Agr.; Arn. Arb.; Brit.
Mus. Nat. Hist.)

Cat. Brit. Mus. Nat. Hist. 4:1712, describes its copy as consisting of 41 plates, the 1st 30 being those of the previous issue redrawn in reverse, differently arranged, and provided with a new engraved title. There is no statement about the remaining 11 plates; but they might very well be like those of a set listed under Rossi in Quaritch Cat.376 (Mar. 1923), no.1425, with supplied date 1649. The Dept. Agr. copy of the 1665 ed. similarly includes a number of plates engraved by Rossi but evidently not drawn by Robert himself. (MFW)

Roberti, Giovanni Battista

Le fragole, poemetto. Venezia, Remondini, 1752.
(Lastri, p.110; Niccoli, p.313)

Davis & Orioli, Cat. 23:106, offer copy of the work with imprint: "Bologna, 1752", presumably the 2d ed. given below. Here the author's name is given as "Guerino", tho the Brit. Mus. and other authorities call him Giovanni Battista. Davis & Orioli give him the title "conte", and he is sometimes called "P." or "padre".

Davis & Orioli, l.c., characterize this as "A rare poem in ottima rima in praise of the strawberry, exceedingly rare", and mention a few vignettes showing scenes, as strawberry picking, "the famous Fragolata", etc.

Re, Diz. Rag. Lib. Agr. 3:11, says the 1st canto gives instructions for the cultivation of strawberries, while the 2d tells how they are gathered and brought to market.

schiedener pflanzen für liebhaber der schönen gartenkunst.
1.[-4.] hft. Winterthur, H. Steiner und comp., 1791-94.
96 p. 20 pl. (Dept. Agr.)

This contains no trace of the author's identity, but is credited to Roemer on authority of Kayser, 2:300, and Dochnahl, p.51, in both of which it is entered under title, with author's name inserted in curves. It is also reviewed without any clue to its authorship in Becker, Taschenbuch für garten freunde, 1:314 (1795).

Dochnahl, l.c., says this work was also issued with title: "Plantes et arbustes d'agrément"; but the latter title is given by Pritzel, 2d ed., no.1725, under Clairville, Joseph Philippe de, and is described as consisting of 90 p. and 20 pl., like the "Garten der Flora" of the same date. The signed plates of the latter are by H. Schellenberg, who made the plates for Clairville's "Collection choisie de plantes et arbustes" or "Auswahl von pflanzen und gesträuchen" (Zürich, 1796-1800). In this work the "Plantes et arbustes d'agrément" is mentioned, with a slight presumption in favor of Clairville's authorship, but without definite claim thereto.

There is no copy of the French text available; and the only one located, in the British Museum, is entered under title, without a hint as to its authorship. It is evident from the "Garten der flora" that the German and French works must have been entirely separate; and it is entirely possible that they were written by different persons, to be used with the same set of plates. Mus. copy is in 2 pts., 1796, and Darmstadt copy in 2 pts., 1790. Altho it is not so stated, the Kopenhagen copy, dated 1790-96, may be of two eds. It is also possible the 1st pt. of the Brit. Mus. copy is merely a reissue with new date.

1. The first part of the paper is devoted to the study of the

properties of the function $f(x)$ defined by the series
$$f(x) = \sum_{n=0}^{\infty} a_n x^n$$

where a_n are the coefficients of the series. It is shown that the function $f(x)$ is continuous and differentiable in the interval $(0, 1)$. The function $f(x)$ is also shown to be bounded in this interval.

2. In the second part of the paper, the function $f(x)$ is studied in the interval $(1, \infty)$. It is shown that the function $f(x)$ is unbounded in this interval and that it has a vertical asymptote at $x = 1$.

3. In the third part of the paper, the function $f(x)$ is studied in the interval $(-\infty, 0)$. It is shown that the function $f(x)$ is bounded in this interval and that it has a horizontal asymptote at $y = 0$. The function $f(x)$ is also shown to be differentiable in this interval.

Title differs slightly from that of first ed., but the text is almost identical save for a few changes in spelling and phraseology.

Emanuel König, Georg. Helv. Cur. (1706), indicates that this ed. was published at Schaffhausen, but Haller, Bib. Bot. 1:546, gives Zug in the imprint.

Haller's citations, "Neues blumenbüchlein. A Grefflingero recusum", with reprints, "Frankfurt, 1684" and "Hannover, 1692", probably refer to some entirely different work. (MFW)

Seguier, Bib. Bot., p.391, gives imprint: "Zug, Franz Carl Ross, 1682", crediting copy to "B. R.", i.e. the present Bibliothèque Nationale. 1682 is probably an error for 1687.

Roll, Timotheus von

Newes blumen-büchlein ... Durch einen liebhaber der garten-recreation. Costantz, 1669; and rev. ed., 1687.

Der Schweitzerische botanicus, auss des seligen P. Timotheaei a Roll Capuc. hinterlassenen garten-künsten ... Durch einen liebhaber der garten-recreation. [Zug? 1687]

Very little information can be found about the reverend father Timotheus von Roll beyond that shown in the title of the 1687 edition of his "Blumen-büchlein", namely, that he was a Franciscan of the Capuchin order. His writings have not been found in the "Bibliotheca scriptorum ordinis minorum S. Francisci Capuccinorum" of Dionigi di Genova (Venetiis, 1747), or in other bibliographies of the monastic orders. It would appear that he was living in 1669, when the first edition of his "Blumen-büchlein" came out, but he must have died before 1687, inasmuch as the "Schweitzerischer botanicus" is said to be based on garden lore left by the deceased father Timotheus von Roll.

The "Neues blumen-büchlin" of 1687 says that the work is to a great extent taken from Ferrari, "De florum cultura" (1633), but, altho it quotes Ferrari directly in some cases, and covers many of the same flowers, Roll's work seems to have been rearranged and rewritten to meet some particular need.

It is probable that Haller's citations, Bib. Bot. 1:546, of "Neues blumenbüchlein. A Grefflinger recusum", published "Frankfurt, 1684" and "Hannover, 1692", refer to some entirely different work. On the other hand, it is probable that the "Blumen-büchlein" and "New-vermehrtes blumenbüchlein", published Costantz, 1691 and 1693, and credited to J. G. Spengler, may be related to the book of Timotheus von Roll.

Emanuel König, in the preface of his "Georgica Helvetica curiosa" (1706), says Roll's "Schweitzerischer botanicus" was posthumously published by Pet. Steinkopff at Zug, in 1687, and a new issue of his "Blumen-büchlein" was published in that year at Schaffhausen, by Heinrich Scretta von Zavorziz, M.D., of that city. The fact of its publication at Schaffhausen is not confirmed by other authorities, altho it is rather plausible to suppose it was printed in the place where its editor lived. Kat. Landb. Bib. København (1921), p.870, does not even indicate the place, and Haller, Bib. Bot., 1:546, gives it as Zug. This may, however, have been due to confusion with "Der Schweitzerische botanicus", issued the same year. The Dept. Agr. copy has a dedication on the verso of the title, signed "Hircanius Starke von Zartowiz", after which is a MS note, "Anagram Hainricus Skreta von Zaworzit M.D. celeberr."

Roll, Timotheus von (cont.)

König, l.c., also mentions the editor's use of this name. Altho it looks quite as genuine as the real one, the latter is found in other connections that prove its authenticity, altho the spellings are far from uniform.

As no copy of "Der Schweitzerische botanicus" has been located in the United States up to the present time, it has not been personally examined. It is mentioned as "nothing but a garden book" by Emmanuel von Haller, Bib. Schweiz. Gesch. 1:505 (1785), where he treats it as anonymous, and remarks that it needs no comment, that is, in a bibliography of botanical works. That it was published, with a different editor, in the same year as the "Neues blumen-büchlin" seemed rather suspicious. This raised a question whether it might not actually be another edition of the same book, a suspicion greatly strengthened by the following discoveries.

In an examination of "Der Curieuse pfropff- und oculir-meister" (Hannover und Wolffenbüttel, 1695), pt.2 was found to contain references to Timotheus von Roll, with mention of the dates 1669 and 1687. This suggested that pt.2 might be based upon one of Roll's books. Some of the material could be recognized in the "Neues blumen-büchlin" of 1687, but the phraseology was quite different, and the latter book contained little or none of the lore on the influence of the planets and signs of the Zodiac that appeared in "Der Curieuse pfropff- und oculir-meister". Finding that the Stadtbibliothek of Zürich owned a copy of the 1713 edition of the "Botanicus", as well as other books that were involved, we sent a number of extracts from "Der Curieuse pfropff- und oculir-meister" to be compared there. Dr. Hans Barth of that library discovered that the 2d part of this work had been reprinted almost verbatim from "Der Schweitzerische botanicus". (Hans Barth to MFW, May 31, 1921).

Seguier, Bib. Bot., p.391, lists the "Schweitzerischer botanicus" with imprint: "Zug, Franz Carl Ross, 1682", and while it is likely that the printer's name is correct, the date is not given by other authorities; and in view of the fact that 1687 is cited in part 2 of "Der Curieuse pfropff- und oculir-meister", it does not seem probable that the "Botanicus" could have been issued as early as 1682. However, Seguier credits his entry to "B. R." or Bibliothèque Royale, that is, the present Bibliothèque Nationale, so that it should be possible to check this imprint date.

Leroy, Dict. Pomol. 6:323 (1879), gives title: "Annuaire du cultivateur, réimprimée par ordre du Département de Maine-et-Loire, 1793-1794." Re's review says the author himself states that this was modelled after the French work; "L'Agronome." this is also shown in the preface to the 1783 ed., v.1, p.ix-x, probably reprinted from the original one. Presumably the work intended is "L'agronome, ou Dictionnaire portatif du cultivateur," by Pons Augustin Alletz, 1760 et seq.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry must be clearly documented, including the date, amount, and purpose of the transaction. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze data. These methods include direct observation, interviews with key personnel, and the use of specialized software tools. Each method is described in detail, highlighting its strengths and limitations.

The third section provides a comprehensive overview of the results obtained from the data collection process. It presents a series of tables and graphs that illustrate the trends and patterns identified in the data. The author also discusses the implications of these findings for the organization's operations and future planning.

Finally, the document concludes with a series of recommendations based on the findings. These recommendations are designed to address the identified issues and improve the overall efficiency and effectiveness of the organization's processes. The author stresses the importance of implementing these recommendations promptly to achieve the desired outcomes.

Bouchard-Huzard, l.c1, says that this was completed by a "7^e chant" published in 1782. The poem then became: L'agriculture, poëme. Paris, 1774-1782. "Seule édition complète." See next entry.

Brunet, 4:94, notes that the edition of 1777 does not contain the supplement, i.e. 7th book, first published in 1782. This tallies with Bouchard-Huzard's statement about editions both of 1777 and of 1800: "Ne contient encore que six chants."

For this edition Bouchard-Huzard gives alternative title: "Les Géorgiques françaises."

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The second step is to gather relevant information and data. This can involve research, consultation with experts, or collecting data from various sources.

3. The third step is to analyze the information and data collected. This involves identifying patterns, trends, and relationships that can help in understanding the problem.

4. The fourth step is to develop a solution or answer. This involves applying the knowledge and skills gained from the previous steps to create a response that addresses the problem.

5. The fifth step is to evaluate the solution or answer. This involves checking the results against the original problem and requirements to ensure that the solution is effective and accurate.

6. The sixth step is to communicate the solution or answer. This involves presenting the findings in a clear and concise manner that is easy for others to understand.

7. The seventh step is to reflect on the process. This involves thinking about what was learned from the experience and how it can be applied to future problems.

8. The eighth step is to document the process. This involves creating a record of the steps taken and the results achieved, which can be used for future reference.

9. The ninth step is to review the process. This involves looking back at the entire process to see if there were any areas for improvement or if the solution was truly optimal.

10. The tenth step is to implement the solution. This involves putting the solution into practice and monitoring its effectiveness over time.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were incubated in the YEA medium for 24 h at 28 °C. The cell concentration of the *Agrobacterium* strains was adjusted to 10⁸ cells/ml. The cell suspension was then incubated with the plant explants for 24 h at 28 °C. The explants were then cultured on the selective medium. The transformation efficiency was determined as the number of transformed explants per explant. The data were the mean of three independent experiments.

Rozier, Francois (1734-1793)

Cours complet d'agriculture théorique, pratique, économique, et de médecine rurale et vétérinaire. Ou Dictionnaire universel d'agriculture ... rédigé par Rozier ... Précédé d'un discours sur l'exposition ... de l'économie rurale ... par M. A. Thouin. Paris, 1781-1805. 12 v. (Dept. Agr.; Lib. Cong.; Brit. Mus.)

The Brit. Mus. Cat., from which our title and collation are taken, gives the dates as 1801-05, but the dates of volumes of the Dept. Agr. copy, v.1-10, run from 1785 to 1800. Volumes 1, 2, 3, 6, are dated 1785; v.4, 7, 1786; v.5, 1787; v.8, 1789; v.9, 1796; v.10, 1800. The Lib. Cong. set likewise has v.1-10, 1785-1800.

Pritzel, both eds., and Brunet, 4:106, both give 1781 as date when publication began. The Dept. Agr. copy of v.1, with date 1785, contains the "avis de l'éditeur," p.vi, which apologizes for delay in the appearance of the first volume, which had been advertised for the end of 1780. On the opposite page is the "approbation," which is dated May 16, 1781. Dugour, in his sketch of the life and works of Rozier, in v.10, p.i-xvj, states (p.x) that "Le premier volume du Cours d'agriculture parut en 1783." Altho we do not find any evidence of the issue of this work in parts, it is possible that some portion of v.1 may have come out prior to the title date 1785.

Pritzel states that the last 3 v., prepared after the death of Rozier in 1793, were edited by André Thouin and Antoine Augustin Parmentier. As a matter of fact, v.10, 1800, was edited by Chaptal, Dussieux, Lasteyrie, Cadet-de-Vaux, Parmentier, Gilbert, Rougier-Labergerie and Chambon, while the names of Thouin and Parmentier appear at the head of the list of editors of v.11 and v.12, both issued in 1805, according to Allg. Lit. Ztg., May 23, 1807, no.123, col.977-980; and Beckmann, Phys.-Oekon. Bib., 23:259-266 (1805). The long intervals between the last 4 volumes may account for some other incomplete copies, such as that of the Roy. Agr. Soc. in 10 v. (1797-1800), and one of 8 v. in the N. Y. Society Library.

This was the first part issued of an intended work in 12 volumes, for which about 11,000 figures had been prepared when everything was lost in the great fire of Upsala in 1702. The 2d volume of the work had also been published in 1702, but very few copies of either had been taken from the press, and both are excessively rare. Only a few copies are known of Liber I, 1702, comprising the grasses, sedges and rushes, which is reproduced in "Reliquiae Rudbeckianae" (London, 1789), but is not included in this bibliography. Liber II, 1701, containing the bulbous plants: iris, narcissus, hyacinth, tulip, lilies and saffron, is said to be even more rare than the first. Above examples are listed by Krok, Bib. Bot. Suec., p.604, besides which Jackson, Guide Lit. Bot., p.30, mentions a complete copy in the Sherardian library at Oxford. Haller, Bib. Bot., 1:530, said that he possessed a copy of Liber II; but there is no trace of its present location.

Haller, 1:529, and Miltitz, col.175, give the date as 1664, but Krok, p.604, whence this title is quoted, does not indicate an edition of that date. It has somewhere been said that this work lists a good many introduced plants.

Pritzel and Dochnahl give the same title for both editions, altho other citations vary considerably. Rudolphi himself, in Annalen der Gärtnerey (1797), st.7, p.128, refers to this as his "Nelken-tabelle," published at Meissen, 1787, by Erbstein, saying the publisher in his list for 1796 had promised to get out another ed., correcting the errors of the first one. This ed. is cited in Ann. d. Gärt. st.1, p.20 and st.2, p.5 (1795), as "Nelkentheorie."

The imprint and collation are from Pritzel, 1st ed. Kayser, 4:565, gives Goedsche as publisher, but Erbstein is given in Annalen der Gärtnerey (1799), st.10, p.77. In this review the added "abhandlung" is said to be one by Rudolphi reprinted from Ann. d. Gärt. (1797), st. 5, p.1-8, with title: "Ein bewährter vorthail viel und guten nelken-saamen zu erbauen."

Ruel, Jean (1479-1537)

De natura stirpium libri tres. Parisiis, ex officina Simonis Colinaei, 1536. 884 p. F°. (Dept. Agr. etc)

"Jean Ruel, who was physician to Francois 1^{er}, notes certain varieties of fruit trees with their common names in French together with many native and cultivated species." - Gibault, Étude, p.712.

The book is dedicated by its author to "François, first of that name, most Christian king of the Gauls." This monarch is credited with bringing Florentine gardeners into France, where they began to develop methods of gardening based on local conditions, and made some of the earliest contributions to the indigenous literature of the subject. See Savastano's discussion of the appendices to the first French version of Crescenzi, in Ann. R. Staz. Sper. Agrumic. e Fruttic. Acireale, 6:110-115 (1922). Ruel's names throw some light on the plant materials of the period. Altho Gibault refers to them as common names, they are usually somewhat Latinized, and the vernacular form is often hard to recognize.

Ruel also, in the introductory part of his work, gives a few cultural directions: "De hortensium semente, & quo tempore sata nascuntur" (p.49-56); "De insitione" (p.86-90) etc.

Other issues of this book are: Basileae, in officina Frobeniana, 1537, 1543, and 1573, all in folio; and Venezia, per Bernardum Bindonum, 2 v. in octavo.

De Bure, Vol. de la Jurisprudence (1764), p. 322-323, item 1558, notes the excellence of the 1st ed. by Colinaeus, but says copies thereof are not very expensive. At the present time, this edition is located in most of the important botanical libraries and other large collections, while the later issues are somewhat less common.

In the 1767 ed., however, the author describes experiments with dates therefor in the years 1757 and 1758. On p.161 he states: "It is about a year since I began the trials; and between that time and this, I have made them various ways." An edition of 1763, therefore, would not have been impossible.

Feuillant, à Paris 1675.

Altho this title is given fully by Müchhau-

to the work of the same title by Jean Merlet,
which was published anonymously in 1675. See

Saint-Etienne, Claude (cont.)

Instruction pour connoître les bons fruits & les arbres fruitiers, selon les mois de l'année, & la façon de les cultiver, par Claude de Saint-Etienne, Bernardin. Paris, De Sercy, 1660.

Title from Lelong, Bib. Hist. France, 2.éd., 1:199. It is not certain, however, whether the author's name is given exactly as above in the 1st ed. Gibault, Jour. Soc. Nat. Hort. France, 1905, p.729, gives the title briefly, saying the work was reprinted in 1670 and 1687 with a slightly modified title. Seguiet, p.392, Haller, 1:509, and Miltitz, col.288, give only the later form of title, "Nouvelle instruction" &c.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress to ensure that the project is on track.

5. The final step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals and identifying any areas for improvement.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The second step is to gather relevant information and data. This can involve research, consultation with experts, or collecting data from various sources.

3. The third step is to analyze the information and data collected. This involves identifying patterns, trends, and relationships that can help in understanding the problem.

4. The fourth step is to develop a solution or answer. This involves applying the knowledge and skills gained from the previous steps to create a plan or strategy that addresses the problem.

5. The fifth step is to implement the solution and evaluate the results. This involves putting the plan into action and monitoring the progress to ensure that the problem is solved effectively.

1. The first step in the process of the investigation is to identify the problem. This is done by gathering information about the situation and the people involved. The next step is to analyze the information and determine the cause of the problem. This is done by looking at the facts and the evidence. The third step is to develop a plan of action. This is done by deciding what needs to be done to solve the problem. The fourth step is to implement the plan. This is done by putting the plan into action. The fifth step is to evaluate the results. This is done by looking at the outcomes and determining if the problem has been solved.

THE FOLLOWING ARE THE RESULTS OF THE INVESTIGATION

1. The first result of the investigation is that the problem was caused by a lack of communication. This was determined by looking at the facts and the evidence. The second result is that the problem was caused by a lack of resources. This was determined by looking at the facts and the evidence. The third result is that the problem was caused by a lack of training. This was determined by looking at the facts and the evidence. The fourth result is that the problem was caused by a lack of supervision. This was determined by looking at the facts and the evidence. The fifth result is that the problem was caused by a lack of accountability. This was determined by looking at the facts and the evidence.

1. The first step is to identify the problem or question that needs to be addressed. This involves understanding the context and the specific requirements of the task.

2. Next, it is essential to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing resources.

3. Once the information is gathered, the next step is to analyze it. This involves identifying patterns, trends, and potential solutions. It is important to consider all possible angles and to be open to new ideas.

4. After analysis, the next step is to develop a plan or strategy. This should be based on the findings of the analysis and should take into account the resources available and the constraints of the situation.

5. The final step is to implement the plan. This involves putting the strategy into action and monitoring the progress. It is important to be flexible and to be prepared to make adjustments as needed.

Schmidt, C. F.

In its author index the Bradley Bib. 5:772, includes under this name two different authors and a reference to a third who is equally distinct. First, there are five or six titles in Danish, relating to silviculture, and dating from 1783 to 1800. Then follow two German titles for a single work on gardening which was issued in many editions, the first in 1798. And finally there is a reference to Berg, Otto, the author of "Darstellung und beschreibung sämtlicher in der Pharmacopoea Borussica aufgeführten offizinellen gewächse" (1858-63), a later edition of which has the title, "Atlas der offizinellen pflanzen" (1891-1902). The plates of this work were drawn by a certain C. F. Schmidt, who was also the artist of Karsten's "Auswahl neuer und schönblühender gewächse Venezuelas" (Berlin, 1848), and who can be pretty safely distinguished from the other two Schmidts by his period as well as his function as an illustrator.

The Danish works on silviculture stand by themselves in the Bradley index, but apparently for no other reason than their alphabetical order, so that one might naturally suppose the German titles on gardening were by the same person. They are quite distinct, however, and full names are known for both authors. That of the German horticultural writer is given as Carl Friedrich Schmidt on the title-page of the first edition of his work, "Der ehrliche baum- und küchengärtner", 1798, as shown by a transcript of the title in Becker, Taschenbuch für gartenfreunde, 1799, p.382-384. Becker's review, altho rather full, gives no hint of the author's identity. His name again appears in full in the 8th edition of the book, published in 1816. Kayser, Bücher-lexikon, 5:117-118, enters his works under Schmidt, Karl Friedrich, but regards this name as a pseudonym of J. A. C. Löhr, probably because, as Kayser states, the 6th edition of this gardening book was published "Mit J. C. F. Müller", a name generally accepted as one of Löhr's many aliases. Whether this phrase implies that the work was actually written by Müller, or that this edition was revised by him, or merely that it was issued with some one of Müller's works, cannot be ascertained. Kayser enters all of Löhr's horticultural writings under the name of Müller, but does not indicate the latter as author of Schmidt's book, nor give the slightest clue to it under either Müller or Löhr. The latter may very probably have used the name of Carl Friedrich Schmidt as a pseudonym, but in the circumstances it seems preferable to treat Schmidt as the veritable author rather than to enter this book under the name of Löhr.

Schmidt, C. F. (2)

The full name of the Danish writer on silviculture is less easily located. It is not in the "Bibliographia Universalis Silviculturae, I. Daniae" (1931), which has a list of his works on p.193-194. It is given in full in the index, p.1246, of Kat. Landb. Bib. København (1921), but not in the entries under Schmidt on p.905 and p.948. This index gives his forenames as "Chr. Frands", while they are "Chr. Franz" in Mariboe, "Fortegnelse over Dansk havebrugs litteratur" (1909), p.9. The first name is supposedly "Christian", and altho the second names are evidently identical, it is impossible to tell which spelling is correct. In view of the fact that the surname is German in its form, there is a slight probability that the second name was also originally spelled in German fashion, as given by Mariboe, who is in general a careful bibliographer.

So far as the Bradley Bib. is concerned, it is likely that its compilers had not seen any editions of the German horticultural work which show the author's name in full, as its entries closely follow those of Dochnahl, Bib. Hort., p.142, and most of them are daggered, indicating that they were not actually examined. Altho the Bradley Bib. makes no special effort to give author's names in full, it does attempt to distinguish those having the same initials, and this combination of three different persons under one name must have been a mere accident. Title from review in Becker, Taschenbuch für garten-freunde, 1799, p.382-384. Author's name is given in full in an apparently accurate transcript of the title-page, but the review gives no hint of his identity. The same title occurs in slightly abbreviated form, but definitely giving the adjective "Ehrliche" and the full name of the author, in Allg. Lit. Ztg., Intbl. Mar. 28, 1798, p.445; and in Beckmann, Phys.-Oekon. Bib. 20:248 (1799). The latter, indeed, adds to the title, but appears to give it less exactly than Becker.

This is the first edition of Schmidt's "Vollständiger und gründlicher gartenunterricht", the 2d ed. of which is entitled: "Der wohlerfahrene baum- und küchengärtner", a title which was probably used thru the 5th ed., 1808, and which is given by Kayser, Bücher-lexikon, 5:117, as that of the 1st ed. Dochnahl, Bib. Hort., p.142, enters the work under "Vollständiger ... gartenunterricht", giving the other in curves, as if it were an alternative. Bradley Bib. 3:103, seems to have borrowed most of its entry for this work from Dochnahl, and with exception of the 2d ed., 1802, all those noted are daggered, indicating that they had not been seen by the compilers of the Bradley Bib. It seems as if none of the bibliographers had been aware of all the changes in the title of this book.

Schmidt, Carl Friedrich (cont.)

Kayser, l.c., regards Karl Friedrich Schmidt as a pseudonym of Johann Andreas Christian Löhr, who published many horticultural works under the name of J. C. F. Müller. Kayser uses the phrase "Mit J. C. F. Müller" in the title of the 6th ed. of the "Vollständiger ... gartenunterricht", and this may have given rise to the attribution; but the phrase may mean merely that this ed. was revised by Müller, or appended to some of his publications. Kayser, moreover, does not refer to Schmidt from either Müller or Löhr. While it is not unlikely that Löhr wrote under the name of Schmidt, the fact is not shown by other authorities. Treating Schmidt thus as a veritable author seems wiser than entering this work under Löhr. (MFW)

----- Der wohlerfahrene baum- und küchengärtner. 2. aufl. Leipzig, 1802. 246 p. (Bradley Bib. 3:103)

This edition is noted by Kayser, Bücher-lexikon, 5:117-118, and Dochnahl, Bib. Hort., p.142, but the latter uses a later form of the title, while the entry in Bradley Bib. seems to have been made from a copy actually seen by the compiler, and therefore is probably correct. It is important, both because it shows that the change of title occurred in this edition, and because the paging is the same as that of the 1st ed., suggesting that this may have been merely a reissue with a new title-page. (MFW)

----- 3. aufl. Leipzig, 1803. (Dochnahl, l.c., p.142)

----- Der wohlerfahrene baum-, küchen- und blumengärtner, oder Vollständige und deutliche anweisung, alle geschäfte in dem garten zu besorgen. 4. verb. und verm. aufl. Leipzig, 1805. (Beckmann, Phys.-Oekon. Bib. 23:361-362)

Beckmann's notice says the 1st ed. was reviewed in the ~~same~~ journal, v.20, p.248, but the title has now been changed and many improvements introduced. He mentions specially a gardener's calendar not found in the original edition. This 4th ed. is also recorded in Miltitz, Bib. Bot., col.248, after Beckmann, and in Dochnahl, l.c.

Above title from Beckmann is probably slightly abbreviated, but shows a likeness to both the 1st and 2d eds. The addition of the "blumengärtner" suggests that this may have been the first issue covering the topic of floriculture. If this had been borrowed from some other author, it might account for the attribution of this work to J. A. C. Löhr. (MFW)

Schmidt, Carl Friedrich (cont.)

----- 5. Aufl. Leipzig, 1808. (Dochnahl, l.c., p.142)

According to Kayser, Bücher-lexikon, 5:117-118, the edition of 1808 was the 6th, appearing with the title, "Vollständiger und gründlicher gartenunterricht", but according to other authorities it seems more likely that the latter first appeared in 1810.

----- Vollständiger und gründlicher gartenunterricht, oder Anweisung für den obst-, küchen- und blumengarten. 6. Aufl. Leipzig, 1810. (Dochnahl, l.c.)

Kayser, l.c., gives date of the 6th ed. as 1808, but agrees with Dochnahl that the 6th was the first edition with above title, and both state that it is "Mit J. C. F. Müller". Inasmuch as the latter was one of the pseudonyms of J. A. C. Löhr, this may be the reason why Kayser considers Schmidt's name also a pseudonym of Löhr. (MFW)

----- 7. Aufl. 1811. (Dochnahl, l.c.)

----- 8. Aufl. Leipzig, Bei G. Fleischer dem jüngern, 1816. 372 p. (Dept. Agr.)

The "Anhangen" of this edition suggest the title of the original, published 1798. (MFW)

----- 8. ganz Neubearb. ... Aufl. Leipzig, 1818. 402 p. (Kat. Landb. Bib. København (1898), p.597)

----- 9. Aufl. 1820. (Dochnahl, l.c.)

----- Neue Ausgabe. Leipzig, Fleischer, 1823. (Kayser, l.c.; Dochnahl, l.c.)

Kayser calls this the 11. Auflage, but some of the editions may not have been numbered.

The first part of the report is devoted to a description of the general situation in the country. It is a very interesting and detailed account of the country's history, geography, and population. The author has done a great deal of research and has gathered a wealth of information. The report is well written and is a valuable contribution to the study of the country.

The second part of the report is devoted to a description of the country's economy. It is a very interesting and detailed account of the country's economic situation. The author has done a great deal of research and has gathered a wealth of information. The report is well written and is a valuable contribution to the study of the country's economy.

The third part of the report is devoted to a description of the country's culture.

The fourth part of the report is devoted to a description of the country's politics.

The fifth part of the report is devoted to a description of the country's social conditions.

The sixth part of the report is devoted to a description of the country's education.

The seventh part of the report is devoted to a description of the country's health.

The eighth part of the report is devoted to a description of the country's environment.

gives the author's second name as "Franz", while
it is spelled "Frands" in the index to the Køben-

this author are on silviculture, which is possi-
bly the chief concern of this one, but this may
have some interest in connection with varieties
of fruit trees known in Denmark in 1793. (MFW)

There is some confusion about an ed. or a vol. of 1808, Brunet, 4:171, says that the Bücherlexikon of Heinsius, v.3, announces an edition of Schmidt, 3 v., Vienna, 1808. Kayser, 5:108, and Dochnahl, p.142, give a 3 v. ed. of Vienna, 1792-1808, with 165 plates. Publisher was Geistinger according to Kayser, Gerold according to Dochnahl. Both of these add a 4th vol. in 2 parts containing plates 166-200, published at Vienna by Beck, but give no date. It looks as tho a vol. must have appeared in 1808 containing part of the plates of v.3 and part of those of the 1822 v.4 as given by Pritzel. Arn. Arb. Cat. as well as Pritzel gives 240 plates as the complete number.

Schneevoogt, George Voorhelm (b.1775)

According to W. Roberts, "The Voorhelms of Haarlem," Jour. Roy. Hort. Soc. 60:199-208 (May 1935), the "G. Voorhelm Schneevoogt" who wrote descriptions for Schwegman's "Icones plantarum rariorum" (Haerlem, 1793), was George Voorhelm, born 1775, son of Gottfried Schneevoogt and grandson of George Voorhelm, author of the "Treatise on the hyacinth." The Library of Congress printed card for Schwegman's "Icones" (1-6505) gives an added entry for Schneevoogt, Gustav Eduard Voorhelm, without dates. This was most likely the Gustaaf Eduard Voorhelm Schneevoogt (1814-1871), whose "Levensschets" by Donders, in Jaarb. K. Akad. Wetensch. Amsterdam, 1872, p.50-99, states that he sprang on his father's side from the Schneevoogts and Voorhelms who were noted in the floricultural history of Haarlem. It was the custom that the son of the house who was so designated should become the head of the floricultural firm, and this lot fell to the father of Gustaaf Eduard, who was probably our George Voorhelm Schneevoogt, born in 1775. The latter must have been the "G. V. Schneevoogt" whose article in Allg. Teut. Gart. Mag. 2: 420, is dated "Harlem 30. Sept. 1805," and member of the firm issuing the "Blumenzwiebel-Catalog von den Herrn. Voorhelm u. Schneevoogt, blumisten zu Haarlem in Holland," which is extracted in the same journal, Intelligenzbl. no.4, p.xxxiii-xxxiv (June 1809). There are also articles signed "Schneevogt" or "Schneevoogt" who was a "blumist in Haarlem" in Verhandl. Verein Beförd. Gartenb. Berlin, 2:51-56 (1825); 10:252-265 (1834); and 11:261-266 (1835). The date of his death has not yet been found. Mr. Roberts' article, l.c., quotes documents showing that the firm name was "Voorhelm & Schneevoogt" in 1774 and 1775, and from the extract in Allg. Gart. Teut. Mag., it appears that the firm retained the same name at least as late as 1809. (MFW-Oct.1938)

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

1. The first of these is the fact that the *Journal* is a very important source of information for the public. It is a source of information that is not only accurate but also timely. It is a source of information that is not only accurate but also timely.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress regularly to ensure that the project is on track.

5. Finally, the fifth step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals to determine the effectiveness of the intervention.

Mayer, Pomona franconica, gives this as an ed. of Groen, Jan van der. Nederlandtse Hovenier (1st ed. 1670) But on examination I find that altho Schwänder has drawn upon Groen, and possibly also upon Nylandt, whose Nieuwe Verstandige Hovenier (1672) is bound with Groen of 1670, in his "Erinnerung an den leser" (opp. p.1.) he mentions his use of other writers on gardening, and especially "Johann von Groen einer Holländer." Hence this is not a regular case of piracy. Moreover, Schwänder appears to have re-written his material quite completely. (M.F.W.)

THE EFFECT OF THE DIET ON THE BLOOD PRESSURE IN THE NORMAL ADULT
The effect of the diet on the blood pressure in the normal adult has been
studied by many investigators. The results have been conflicting. Some have
found that a low salt diet lowers the blood pressure, while others have
found no effect.

Physikalischer lust-garten, worinnen ... sehr viele ... natur-fragen ... untersucht und gründliche erörtert worden. Jena, J. J. Ehrt [Printed Rodolstadt] 1690. (Brit. Mus.; Linn. Soc. Lond.)

The British Museum enters the author's "Deliciae Physico-hortenses" (1702) merely as an edition of the above, but also gives his "Deliciae physicae, das ist, Physikalische ergetzlichkeiten" (Erffurth, 1701), as if it had no connection with it. Pritzel, however, 1st ed., no.9498, and Haller, 1:566, give a title: "Physikalische ergötzlichkeiten, das ist, Physikalische gartenlust und physikalische himmelsbetrachtung und gartenlust," with dates 1701, 1705, and 1716. This suggests a possible connection or confusion between Schwimmer's works, at least in certain issues. There is, however, a veritable 3d ed. of his "Deliciae physico-hortenses" (1717), as it was advertised by Dultz, Ant.-Kat. 61, no. 477, with title practically identical with that of the Dept. Agr. ed. of 1701-02. Seguier also, p.180, following "Rivin. Bibl. Cat.," gives the 1701 publication as in 3 parts; and while nothing about the Dept. Agr. copy indicates that it was issued in this form, it seems possible that the "Deliciae physicae" of the British Museum may have been considered one of the 3 parts in Rivin. Bibl. Cat. (MFW)

----- Deliciae physico-hortenses, oder, Physicalische garten-lust. Erffurth, J. C. Stosseln, 1701-02. 2 v. (Dept. Agr.; Brit. Mus. (1702)

Dept. Agr. copy has 2 pts., dated 1701, 1702. Brit. Mus. copy is in 2 pts., "zum andern mal gedruckt," both dated 1702. Miltitz, col.295, has an entry with date 1702 and 410 p., which corresponds to pt.2 of Dept. Agr. copy.

----- Erfurt, 1704. 520 p. (Miltitz, col.295)

----- Frankfurt & Leipzig, 1705. (Haller, 1:566)

Haller's title begins: "Physikalische ergötzlichkeiten, Physikalische gartenlust," which is also used by Pritzel for the issue of 1716.

----- Frankfurt & Leipzig, 1716. (Haller, 1:566; Pritzel, 1st ed., no.9498)

----- 3. Aufl. Erfurt, 1717. (Dultz, Ant.-Kat. 61, no.477; Verz. Gartenb. Ver. Darmstadt (1875), p.7)

The title quoted by Dultz corresponds closely with that of the issue of 1701-02 in Dept. Agr.

1. *Chlorophyll a* (Chl *a*) is the primary photosynthetic pigment in most plants and algae. It is a green pigment that absorbs light energy in the blue and red regions of the visible spectrum.

2. *Chlorophyll b* (Chl *b*) is an accessory pigment that absorbs light energy in the blue and orange-red regions. It transfers energy to Chl *a* for photosynthesis.

3. *Carotenoids* are accessory pigments that absorb light energy in the blue and green regions. They include carotenes (orange) and xanthophylls (yellow). They transfer energy to Chl *a* and also protect the plant from photo-oxidative damage.

4. *Xanthophylls* are a class of carotenoids that are yellow in color. They play a role in light harvesting and photoprotection.

5. *Phycocyanin* is a blue pigment found in cyanobacteria and some algae. It absorbs light energy in the orange and red regions and transfers it to Chl *a*.

6. *Peridinin* is an orange pigment found in certain dinoflagellates. It absorbs light energy in the blue and green regions and transfers it to Chl *a*.

7. *Alloxanthin* is a yellow pigment found in some algae. It absorbs light energy in the blue and green regions and transfers it to Chl *a*.

8. *Diatoxanthin* is a yellow pigment found in diatoms. It absorbs light energy in the blue and green regions and transfers it to Chl *a*.

9. *Diadinoxanthin* is a yellow pigment found in diatoms. It absorbs light energy in the blue and green regions and transfers it to Chl *a*.

10. *Chlorophyll c* (Chl *c*) is a green pigment found in some algae. It absorbs light energy in the blue and red regions and transfers it to Chl *a*.

11. *Chlorophyll d* (Chl *d*) is a green pigment found in some algae. It absorbs light energy in the blue and red regions and transfers it to Chl *a*.

12. *Phaeophytin* is a brown pigment that is a breakdown product of chlorophyll. It is found in some algae and plants.

13. *Phaeoerythrin* is a red pigment found in some algae. It absorbs light energy in the blue and green regions and transfers it to Chl *a*.

Scot, Reynolde (or Reginald)

A perfite platforme of a hoppe garden, and necessarie instructions for the making and mayntenaunce thereof, with notes and rules for reformation of all abuses, commonly practised therein, very necessarie and expedient for all men to have, which in any wise have to doe with hops. Now newly corrected and augmented by R. Scot. Imprinted at London by Henrie Denham, dwelling in Pater Noster Rowe at the Signe of the Starre. 1574. 56 p. (N. Y. Pub. Lib.; Thordarson; Brit. Mus.; Bodleian)

This extended title is given by Rohde, E.S. Old English gardening books (1924), p.117-118. It is also found in Watt, 2:839v, and Allibone, 2:1956; but both of these give 1573 as date of the 1st ed. The Short-Title Catalogue, however, gives 1574 as the 1st ed. Miss Rohde does not give paging, which is from Pritzel, 1st ed. no. 9510, and Bib. Banks, 3:640.

Ed. H. A.

Rothamsted Cat. says "This copy ... lacks the epistle to William Lovelace, the address to the reader, and the epilogue, which are found in the 1576 copy."

London, T. Mabb for W. Shears,
----- 1653. 38 p. (Rothamsted)

^ "Identical with 1640 copy except for the spelling of the title and the addition of a short epilogue, different from the epilogue of the 1576 copy." -- Cf. Rothamsted Cat.

Probably also in The Country-mans recreation, London, 1654, which is at Harvard, Arn. Arb., etc. (MFW)

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were incubated in the presence of 100 mg/ml of gentamicin and 100 mg/ml of rifampicin. The concentration of the *Agrobacterium* suspension was 10⁶ cells/ml. The transformation efficiency was determined by the number of transformants per 10⁶ cells. The data are the mean ± SD of three independent experiments.

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses for all groups. The number of correct responses was significantly higher than the number of incorrect responses for all groups. The number of correct responses was significantly higher than the number of incorrect responses for all groups.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in the YEA medium for 24 h at 28°C. The cell concentration of the strains was adjusted to 10⁸ cells/ml. The cell suspension was mixed with the plant tissue and incubated for 24 h at 28°C. The plant tissue was then cultured on the selective medium. The transformation efficiency was determined as the number of transformants per 100 mg of plant tissue. The data are the mean values of three independent experiments.

Kayser, 5:225, is the only authority who enters this under author's name. He gives the title thus: "Versuch üb. die regelmäss. gärten. Leipz., Leo, 1794," with the following note: "A.u.d.t.: Würdigung u. veredlung der regelmäss. garten &c. Ebd., 1797, ohne d. verf. namen." We found no other mention of a 1797 ed., however. Dochnahl, p.176, enters the 1794 ed. under title with a reference from Semmler's name. Neither Becker, W. G., Taschenbuch für garten freunde, 1796, p.356-357, nor Kat. Landb. Bib. København (1921), p.887, mentions Semmler.

Serres, Olivier de, seigneur du Pradel (1539-1619)

For biography see: François de Neufchateau, Nicolas Louis, "Eloge d'Olivier de Serres, seigneur du Pradel" (in Serres, Olivier de. *Le théâtre d'agriculture et mesnage des champs*. Nouv. ed. Paris, 1804-05. t.1, p.xix-xlvj); Ginet, J. "A la mémoire d'Olivier des Serres (1539-1619)" (in *Congres du Chataignier*, Aubenas, 1935, *Mém. et Rapp.* p.246-254); Vaschalde, Henry. "Olivier de Serres ... sa vie et ses travaux, documents inédits" (Paris, 1886. 232 p.)

The following references are especially concerned with Olivier de Serres as a pomologist: Bunyard, E. A., in *Gard. Chron.*, (3) 54:149-150 (Aug. 20, 1913); Dupetit-Thouars, L. M. A. A., in *Michaud, Biog. Univ.*, Nouv. ed., 39:122-126; Liron d'Airoles, J. de, in *Barral, Rev. Hort.*, 2:138-140 (1867)

Excellent critical descriptions of the works of Serres are given by J. B. Huzard, "Notice bibliographique des différentes éditions du Théâtre d'agriculture d'Olivier de Serres" (in Serres, Olivier de. *Le théâtre d'agriculture et mesnage des champs*. Nouv. ed. Paris, 1804-05. t.2, p. xxj-xlij). Huzard had many issues of this work in his own library, and they are marked with an asterisk in this bibliography. There is also a "Catalogue des livres de J. B. Huzard" (Paris, 1842), from which the editions of Serres owned by Huzard were checked by Vicaire in his "Bibliographie gastronomique" (1890), p.788-789.

In the following list of editions most of those that were in possession of Huzard are so marked, altho in many cases we do not know of any copy now in existence, in order to fix responsibility for bibliographical details which appear very minute and elusive. Many of these editions, no doubt, are in the Bib. Nat. Paris; but it has been possible to locate only two of them, by means of references from editors, &c.

Serres, Olivier de (cont.)

Le theatre d'agriculture et mesnage des champs. Paris, Par Jamet Métayer, imprimeur ordinaire du roy, 1600. 1004 p. F°. (Dept. Agr.; Harvard; Brit. Mus.; Bodleian; Rothamsted; Soc. Nat. Hort. France)

For a detailed description of this edition see Huzard, J. B., Notice bibliographique des différentes éditions du Théâtre d'agriculture d'Olivier de Serres. (In Serres, Olivier de. Théâtre d'agriculture, Paris, 1804-05, v.2, p.xxj-xlij)

Two minor works: "La cueillette de la soye" (Paris, 1599) and "La seconde richesse du meurier-blanc" (Paris, 1603), are extracts or preprints from "Le théâtre d'agriculture," first and second editions, respectively. They were translated into English by Nicholas Geffe, under title: "The perfect use of silk-wormes, and their benefit ... And the fit maner to prepare the barke of the white mulberrie to make fine linnen and other workes thereof" (London, 1607) For further information in regard to these see Huzard, Not. Bib., p.xxij-xxix.

----- Seconde edition, reveuë et augmentee par l'auteur. Ici est representé tout ce qui est requis et necessaire pour bien dresser, gouverner, enrichir et embellir, la maison rustique. Paris, Chés Abr. Saugrain, 1603. 907 p. 4°. (Harvard; Huzard)

"Cette seconde édition contient beaucoup d'augmentations et d'additions faites par Olivier de Serres, depuis la première ... C'est sur cette édition que nous avons principalement fait la nôtre" (i.e. Paris, 1804-05) -- Huzard, Not. Bib., p.xxxij.

----- Troisième edition. Paris, Chés Abr. Saugrain, 1605. 997 p. 4°. (Vassar Coll. Lib.; Bib. Panthéon)

"L'exemplaire que j'ai sous les yeux étoit dans la Bibliothèque de l'Abbaye Sainte Geneviève, à Paris, il est aujourd'hui dans celle du Panthéon, qui la remplace, ou plutôt est la même." -- Huzard, Not. Bib., p.xxxiij.

Inasmuch as later editions are practically reprints of the first three, Huzard does not hereafter repeat details of the title unless they are necessary for identification.

Serres, Olivier de (cont.)

----- Quatrieme edition. Paris, Chez Jean Berjon, 1608. 908 p. 4°. (Huzard)

"Cette édition paroît avoir été faite, page pour page ou à-peu-près, sur celle de 1603; elle ne contient que quelques légères augmentations vers la fin ... Ces augmentations paroissent indiquer qu'Olivier de Serres a surveillé lui-même cette édition, qui en général, est mieux exécutée que la précédente."

"Les Berjon étoient de Geneve, et ils y avoient une imprimerie; Olivier de Serres y avoit été faire une voyage, près de Calvin, en 1661 [i.e. 1651], et ils professoient la même religion; il ne faut sans doute pas chercher ailleurs l'origine des éditions du Théâtre d'agriculture par ces imprimeurs, soit à Paris, soit à Geneve." -- Huzard, Not. Bib., p.xxxiiij.

Brit. Mus. has a copy, "Quatriesme édition, reveuë et augmentée" (Paris, 1608), which may be same as the above, but cannot be completely identified without either publisher or paging.

----- Paris, Chés A. Saugrain, 1608. 907 p. (Harvard)

Huzard does not mention any edition by Saugrain in 1608, but if the typed card for this in the Union Cat. at the Lib. Cong. is correct, its paging indicates that it is a reprint of the 2d ed., 1603. (MFW)

----- Paris, Saugrain, 1608. 997 p. (Rothamsted)

This, like the preceding issue, cannot be identified in Huzard's Notice bibliographique, but from the publisher and paging, it appears to be a reissue of the 3d ed., 1605. (MFW)

----- Dernière édition, reveuë et augmentée. Paris, 1608. (Brit. Mus.)

This may be identical with one or the other of the two preceding issues, although neither of those entries says "Dernière édition." This, however, appears in all the other reprints by Saugrain after the 3d ed., 1605. (MFW)

Serres, Olivier de (cont.)

----- Ou est représenté tout ce qui est requis et nécessaire pour bien dresser, gouverner, enrichir et embellir la maison rustique. Dernière édition, revue et augmentée par l'auteur. Geneve, Par Matthieu Berjon, 1611. 1198 p. 8°. (Arn. Arb.; Huzard)

"Il y a des exemplaires dans lesquels on lit seulement: Par Matthieu Berjon, sans nom de lieu d'impression, tel est celui cité par Haller, et une autre que j'ai vu dans le Dépôt littéraire des Jésuites de la rue Saint-Antoine: dans d'autres on lit: A Cologni par Matthieu Berjon, comme dans un exemplaire que j'ai dans ma bibliothèque; tous sont de la même édition ... Cologni ou Cologny, car on le trouve écrit de ces deux manières, est un des noms de Geneve; beaucoup de copistes et quelques bibliographes écrivent Cologne." -- Huzard, Not. Bib., p.xxxiv.

In Berjon's edition the year is represented in Roman as "M.VIC.XI." Huzard further says in regard to these different issues that, in those he has seen, "A Geneve" is printed, while "A Cologni" is merely stamped upon the title-page.

----- Dernière édition, revue et augmentée par l'auteur. Ici est représenté tout ce qui est utile et nécessaire pour bien diriger, gouverner, enrichir et embellir la maison rustique. Paris, Chés Abr. Saugrain, 1615. 907 p. 4°. (Dept. Agr.; Huzard)

"Cette édition est faite, page pour page, sur celle de 1603 ... et on a ajouté à la fin, les augmentations qui se trouvent à celle de 1608." -- Huzard, Not. Bib., p.xxxv.

Huzard, Not. Bib., p.xxxv, says this is the same as the preceding, and the last of the editions published at Paris.

----- [Geneve] Pour Pierre et Jaques Chouët, 1619. 878 p. 4°. (Rothamsted; Huzard)

"Sans nom de lieu d'impression; mais on sait, et on verra plus loin, que les Chouët faisoient la librairie à Geneve ... Le titre est le même que celui de l'édition de 1611 ... On retrouve à cette édition ce que nous avons déjà observé à celle in-octavo de 1611, des exemplaires sans nom de lieu d'impression, comme le mien; d'autres où A Geneve est poussé seulement, et en petits caractères; d'autres enfin où A Geneve est imprimé, et tous sont également les mêmes. Un exemplaire de la même date: A Geneve, par Matthieu Berjon, qui est dans la Bibliothèque de l'École de Médecine de Paris, et qui vient de la Bibliothèque de l'Académie de Chirurgie, est également de la même édition ... la dernière faite du vivant d'Olivier de Serres."

"Malgré la mort d'Olivier de Serres, toutes les éditions postérieures, celle de 1675 exceptée, portent: Revuë et augmentée par l'auteur." -- Huzard, Not. Bib., p.xxxv-xxxvj.

----- Rouen, chez Lovys du Mesnil, 1623. 907 p. 4°. (Bib. Mus. Hist. Nat. Paris)

Described by Huzard, Not. Bib., p.xxxvj, from above copy. Huzard adds; "Un exemplaire: A Rouen, chez Jacques Hollant, imprimeur ... de la même date, et qui est dans la bibliothèque de mon collègue M. Silvestre, est de la même édition."

L'ouvrage est divisé en deux parties : la première, qui est la plus importante, est consacrée à l'étude de la langue française, et la seconde, qui est la moins importante, est consacrée à l'étude de la littérature française. Serres, Olivier de (cont.)

----- Rouen, Chez Robert Valentin, 1623. 908 p. 4°. (Huzard)

Huzard, Not. Bib., p.xxxvj-xxxvij, gives detailed reasons for considering this edition absolutely distinct from that of du Mesnil of the same place and date, which was based on those of 1615 and 1617, while that of Valentin is reprinted from that of 1608. Huzard notes still another issue of the same date, "Un exemplaire: A Rouen, chez Manassez de Preaulx ... absolument semblable au mien, de chez Robert Valentin, est dans la bibliothèque de M. Fera de Rouville." Huzard finds both these issues contain certain irregularities in numbering of signatures, &c., which he gives in detail, that are not in the editions by du Mesnil and Hollant.

One of these various editions published at Rouen, 1623, is in the British Museum.

----- Geneve, Pour Pierre et Jaques Chouët, 1629. 878 p. 4°. (Brit. Mus. Nat. Hist.; Roy. Agr. Soc.; Cat. Bib. Min. Agr. Italy, Sup.7 (1910), p.149; Huzard)

"Cette édition n'est qu'une réimpression littéraire de celle de 1619, de chez les mêmes libraires." -- Huzard, Not. Bib., p.xxxvij.

----- Rouen, Chez Jean de la Mare, 1635. 908 p. 4°. (Bib. Inst. Nat. France)

Verbatim reprint of edition of Valentin, 1623, tho not so well printed. Another edition of the same date: Rouen, chez Robert Valentin, a copy of which was owned by Parmentier, establishes beyond doubt the connection between Valentin's original edition of 1623, and the above in 1635. Cf. Huzard, Not. Bib., p. xxxvij.

----- Rouen, Chez R. Valentin, 1635. 908 p. (Harvard)

Identical with the preceding. -- Huzard, Not. Bib., p.xxxvij.

Arnold Arboretum has an issue of Rouen, 1635, but does not give its imprint.

----- Geneve, M.DC.XXXVI.

Huzard, Not. Bib., p.xxxvij, says this was in a list of rare books sold February 1789 by Royez, a Paris bookseller, but he suspects this date to be a misprint.

----- Geneve, Pour Pierre & Jaques Chouët, 1639. 878 p. 8°. (Dept. Agr.; Huzard)

Reprint of edition of 1629. -- Huzard, Not. Bib., p.xxxvij.

Serres, Olivier de (cont.)

----- Rouen, Chez Jean Berthelin, 1646. 908 p. 4°. (Kew; Huzard)

Reprint of edition of 1635. -- Huzard, Not. Bib., p.xxxviiij.

----- Geneve, Imprimé pour Samuel Chouët, 1651. 878 p. (Arn. Arb.; Rothamsted; Huzard)

Reprinted literatim from edition of 1639. -- Huzard, Not. Bib., p.xxxviiij.

----- Geneve, Imprimé pour André Chouët, 1661. (Not located)

Listed by Huzard in his Not. Bib., p.xxxviiij, but not critically examined by him. He thinks it probably identical with the preceding, but with a new date and publisher's name. This is the last edition he knows that was published at Geneve.

----- Rouen, Chez David Berthelin, 1663. 908 p. (Huzard)

This closely resembles the edition of J. Berthelin, of 1646, from which it is reprinted; it contains many typographical errors. -- Huzard, Not. Bib., p.xxxviiij. Huzard, l.c., indicates several other editions of Rouen, 1663. One by Jean Machuel, in École de Médecine, Paris, has date given as "D.MC.LXIII," evidently an error for 1663. The "Catalogue des livres de Danty d'Isnard" has an issue: Rouen, Chez Vaultier, and the "Catalogue des livres de M^{de} Ballière" shows another: Rouen, Chez Hérault; but Huzard does not know whether these are identical with those of David Berthelin and Jean Machuel, or whether they constitute distinctly new issues. In addition to the imprints listed by Huzard, Vicaire, Bib. Gastron. (1890), col.789, gives another: Rouen, Malassis, 1663, which he considers identical with the issue by Berthelin described above. Huzard thinks the editions of 1663 are the last published at Rouen.

The Lindley Library has an edition, Rouen, 1663, but does not give its imprint.

Serres, Olivier de (cont.)

----- Dernière édition, reveuë, corrigée du nouveau, et augmentée de la Chasse du loup, et de la composition et usage de la Jauge. Lyon, Chez Antoine Beaujollin, 1675. 902 p. (Huzard)

In this issue the Théâtre d'agriculture occupies the first 878 p., and is followed by a half-title: "La Chasse du Loup ... Par Jean de Clarmongan" [i.e. Clamorgan]

Permission is dated Lyon, 23 Novembre 1674.

This appears to have been reprinted literally from the Geneva editions of the Chouëts. Two other imprints: Chez Jean Bruyset, in the library of Dussieux, and Chez Jean Baptiste Deville, in the library of L'Heritier, both published Lyon, 1675, are considered by Huzard identical with the preceding. -- Huzard, Not. Bib., p.xxxix.

----- Lyon, Chez Jean-Baptiste Deville, 1675. 902 p. (Dept. Agr.)

This answers to Huzard's description of the Beaujollin edition given above.

----- Théâtre d'agriculture et ménage des champs ... Ou l'on voit avec clarté et précision l'art de bien employer et cultiver la terre, en tout ce qui la concerne, suivant ses différentes qualités et climate divers, tant d'après la doctrine des anciens, que par l'expérience. Remis en françois, par A. M. Gisors. Paris, Chez Meurant, An XI (1802) 4 v. (Crerar; Roy. Agr. Soc.; Bib. Nat. Paris; Huzard)

"Cette édition est faite sur celle in-folio de 1600; il y manque donc, outre les retranchements de l'éditeur, toutes les additions qu'Olivier de Serres a ajoutées à la seconde et aux suivantes." -- Huzard, Not. Bib., p.xxxx.

Tho the year of publication is usually given as 1802, Pritzel, 1st ed., gives it 1803, which may be more correct, as An XI extended from Sept. 23, 1802 to Sept. 23, 1803. (MFW)

1. The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved.

2. Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its components and understanding the underlying causes.

3. After analyzing the problem, the next step is to develop a plan. This involves determining the steps that need to be taken to solve the problem.

4. The final step is to implement the plan. This involves putting the plan into action and monitoring the progress.

[Smith, John] (fl.1684)

Profit and pleasure united, or The husbandman's magazine. Being a most exact treatise of horses ... cows ... sheep, swine, goats, and all other domestick cattle, serviceable, profitable, or usefull to man ... together with easie and plain rules and methods for improving arable and pasture-lands ... improving most sorts of grain ... the management, improvement and preservation of fruit-trees, plants and flowers: the manner of ordering flax, hemp, saffron and licrish: with directions for the increasing and preserving of bees ... To which is added the art of angling, hunting, hawking, and the noble recreation of ringing. And making fireworks ... By J. S. London, Printed for S. Lee [etc.] 1684. 210 p. (Lib. Cong.; Harvard (imperfect copy); Brit. Mus.)

----- By J. Smith, gent. London, Printed for J. Blare, at the Looking-glass, on London-Bridge, 1704. 167 p. (Rothamsted)

See also McDonald, Agricultural Writers (1908), p.166-156, and 207, to whom the 1704 ed. only is known. Some confusion exists as to whether this John Smith might be the same one as the author of "England's improvement reviv'd." MFW compared the 1684 ed. of "Profit and pleasure united" with the 1673 ed. of "England's improvement reviv'd" and saw so little similarity between them that she thought it very unlikely that they were written by the same person.

Bib. Min. Agr. Italy. Sup. 2, p.333)

Because this was usually issued with Davanzati's "Coltivazione toscana delle viti, e d'alcuni alberi," the title has sometimes been taken from that work. This was true of the 1610, 1622, and 1631 eds. After the ed. of 1700 the title was: "Trattato della coltivazione delle viti e del frutto" &c.

According to Brunet, 4:229, this was an extract of a work in 4 parts, of which the Trattato di agricoltura (1811) formed the 1st part. See complete quotation under the latter.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the investigation. The investigator must identify the problem and the scope of the investigation. The investigator must also identify the objectives of the investigation. The objectives of the investigation are the goals that the investigator wants to achieve. The objectives of the investigation are the goals that the investigator wants to achieve.

1. The first step in the process of the development of a new product is the identification of a market need. This is often done through market research, which can be conducted in a variety of ways, including surveys, focus groups, and interviews. The goal is to understand what customers want and need, and to identify any gaps in the current market.

Somerset, Mary (Capel), duchess of Beaufort (1630?-1714)

James Britten writes in *The Garden*, 84:428-429 (Aug. 28, 1920) of the Duchess of Beaufort's collection of flower drawings by Everard Kickius and Daniel Frankcom, from plants grown at Badminton at the beginning of the 18th century, many of which have heretofore been supposed to have been introduced to cultivation at later dates. The Duchess is commemorated by the genus *Beaufortia*, R. Brown, in *Aiton, Hort. Kew.*, Ed. 2, 4:418.

1. The first group of people who are interested in the study of the history of the United States are the people who are interested in the history of the United States.

1. The results of the study are consistent with the hypothesis that the level of social support is related to the level of psychological distress. The study found that individuals with higher levels of social support reported lower levels of psychological distress. This relationship was found to be significant in both the bivariate and multivariate analyses.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

Speechly, William (1733?-1819)

Confusion exists with regard to Speechly's dates. The Rothamsted Cat. says: "fl.1776-1821." The Ind. & Epit. Dic. Nat. Biog. has: "fl.1776-1820." Johnson, p.239, following an article signed "H.A.S." in the Gardener's Magazine, 3:383-384 (1828), says that Speechly died Oct. 1, 1819, in the 86th year of his age. This would put the date of his birth in 1733 or 1734. Brotherston, in the Gard. Chron. III, 47: 193, 211-212 (1910), gives 1723 as the date of his birth and says that he died Oct.1,1819, leaving a posthumous work which was afterwards published. The last date mentioned in the Appendix to Practical hints in domestic rural economy (1820), which we assume to be this posthumous work, is in a reference on p.175 to the Nottingham Journal for Aug. 1819.

Practical hints in domestic rural economy, relating particularly to the utility, formation, and management of fruit, kitchen, & cottage gardens, and orchards; and an appendix, containing several original agricultural essays. London, Printed for Longman, Hurst, Rees, Orme, and Brown, 1820. 190 p. (Dept. Agr.; Brit. Mus.; Lindley; Rothamsted)

Speechly, William (cont.)

A treatise on the culture of the vine, exhibiting new and advantageous methods of propagating, cultivating, and training that plant, so as to render it abundantly fruitful. Together with new hints on the formation of vineyards in England. York, Printed for the author, by G. Peacock; and sold by G. Nicol, 1790. 224 p. (Dept. Agr.; Arn. Arb.; Boston Pub. Lib.; Crerar; Mass. Hort. Soc.; Brit. Mus.; Lindley; Kat. Landb. Bib. København (1898), p.614)

----- Dublin, Printed for P. Wogan, P. Byrne, J. Moore, A. Grueber, W. Jones, and R. White, 1791. 307 p. (N. Y. Bot. Gard.; Mass. Hort. Soc.)

----- The 2d ed. with additions. London, Longman, Hurst, Rees, and Orme [1805] 300 p. (Dept. Agr.; Arn. Arb.; Mass. Hort. Soc.; N. Y. Pub. Lib.)

The fact that no date appears on the title-page and that the preface is dated 1789 as in the 1st ed. probably accounts for the variation in the dates assigned to this ed. Each plate in the Dept. Agr. copy of the 2d ed., however, is plainly inscribed: "Published Sept.^r 1st, 1805." The Eng. Cat. 1801-1836 gives Oct. 1805 as the publication date of the book. The Arn. Arb. and Mass. Hort. Soc. have both used [1805] in their printed catalogs. The Astor Library catalog has imprint: "London, s. a." The Brit. Mus. gives [1795?]. We have notes that the 2d ed. is also in the Boston Pub. Lib., the N. Y. Soc. Lib., and in the library of L. H. Bailey.

This dissertation does not appear to have been known to any of the bibliographers; both Pritzel, ed.1, no.9793, and Seguiet, p.185, cite Bib. Rivin.; Boehmer, 3(2):587, does not suggest that he had seen the work, and Gatterer, Lit. Weinb. (1832), p.2, appears to have copied his entry from earlier sources.

Miltitz, Bib. Bot., col.289, gives date 1662, which Haller, 1:580, cites from "Bibl. Hotton.," but indicates 1680 as the correct year. Haller may have inferred this from the privilege. The last leaf of Citricultura gives an "Approbatie" dated Feb. 26, 1682, and extract of the privilege with date July 8, 1680. June 12, 1681, is moreover cited on p.245 of the text.

Sterbeeck, Francis van (cont.)

Den verstandighen hovenier, over de twaelf maenden van't jaer. Beschrijft hoe men op de beste en bequaemste maniere sal hoven-thuynen, lust-hoven en boomgaerden verordineren, bereyden, beplanten en bezaeyen. Als oock vermeerdert met en noodighe en gherieflijcke medecijn-winckel daer in veel nutte en natuerlijcke secreten zijn te vinden voor alderhande ghebreken. Door F. V. S. 2. druck, vermeerdert ende verbeteret. Antwerpen, 1667. 139 p. (Arn. Arb.)

It also contains: "Medecyn-winckel; oft Aenhanghsel van den verstandighen hovenier, om metter haest te vinden raedt en remedie voor alderhande accidenten en ghebrecken der menschen," p.113-139.

Bradley Bib. 3:106, suggests: "Is possibly a Belgian ed. of Aengelen, Petrus van. Verstandige gardenier. 1663." ☹ This theory finds confirmation in statements of Sterbeeck himself, who in the preface to his Citricultura (1682) denied all connection with the Verstandige hovenier and a certain "Kooock-Boeck" which had been attributed to him. ☹ In his Theatrum fungorum, oft Tooneel der campernoelien (1675), Sterbeeck says that in 1668 he had published a little tract on mushrooms, which was bound with this cook book, as both were published in Holland. For this reason many persons had credited him with being author of the "Kooock-Boeck" as well as a book called Den Verstandigen Hovenier, likewise printed in Holland, but that he had neither at that time nor later published anything besides the tiny Tractaet der Fungi.

It would be difficult to identify this work with Aengelen's Verstandige hovenier, without comparison between them; but there were Dutch editions of Aengelen at Amsterdam, 1661, 1662, 1663, and 1665, and one supposedly published in 1668, which was "verbetert door J. C." ☹ It is easy to see that Sterbeeck's Tractaet der Fungi might be bound with, and even give his name to a contemporary edition of this book. (MFW)

Publisher from Robinson Cat. 52, no.352.

The variations in title of this work are brought out in the following entries; Johnson, Hist. Engl. Gard., p.189-190, does not make it clear whether these are all editions of the same book. The Brit. Mus. lists "The gentleman gardener instructed" as one of the eds. of "The young gard'ner's director."

For example, the *Journal of the American Medical Association* (JAMA) has a circulation of 2.5 million, and the *New England Journal of Medicine* (NEJM) has a circulation of 1.5 million. Both of these journals are published weekly, and both have a long history of publishing high-quality research. The *Journal of the American Medical Association* is the largest medical journal in the world, and the *New England Journal of Medicine* is the second largest. Both journals are published by the American Medical Association (AMA) and the Massachusetts Medical Society (MMS), respectively. Die edle garten-wissenschaft, aus Petri Laurebergii rostochiensis Horticultura & Apparatu plantarum. Zusammen gelesen, mit andern garten-autoribus, und edlen liebhabern derselben, conferirt und nach eigener erfahrung auf nürnbergische und fränkische gewohnheit, lufft, und himmel eingerichtet. Jedoch dass man sich derselben auch aller orten in Teutschland bedienen kan. Von W. A. S. V. R. Nürnberg, In verlegung M. und J. F. Endtern, 1671. 340 p. (Dept. Agr.; Kat. Landb. Bib. Kopenhagen (1898), p.597)

"Das andere buch der edlen garten-wissenschaft": p.[187]-340.

Altho in his entry under Laureberg, Pritzel, ed.1, gives this author's forenames as Wolfgang Abraham, the preface of this edition is definitely signed Wolff Albrecht Stromer von Reichenbach, the name which Güntz also uses in his Handb. Landw. Litt., 1:163 and 3:25.

This work, while based chiefly on Laureberg's Horticultura, is a compilation from various sources, with numerous additions by Stromer himself. Cf. Haller, Bib. Bot. 1:448. Altho Laureberg's "Apparatus plantarum" is named in the 1671 title, it is not found in this edition, which like the Horticultura, is divided into two books.

----- Pars altera Horticulturae Laurembergianae. Nürnberg, In verlegung M. und J. F. Endtern, 1673. (Haller, Bib. Bot. 1:448; Stromer von Reichenbach, W.A., in Mandirola, Agostino. Der italiänische blumen- und pomeranzen-garten (Nürnberg, 1679), verso of 3d leaf)

Haller calls this Tomus III, saying it is an altogether different work (i.e., from the "Andere buch" of the 1671 edition?) compiled from the works of Lauremberg, and his remarks suggest that its contents are like those given by Güntz for the final volume of the 1682 edition, q.v.

----- Nürnberg, Endter, 1682. 3v.(336, 364, 703 p.) (Pritzel, ed.1, no.5583; Seguiet, p.406; Haller, 1:448; Güntz, Handb. Landw. Litt. 3:25)

Pritzel and Haller enter under Lauremberg; Seguiet treats as anonymous.

This issue seems to include a later ed. of the adaptations of the Horticultura issued in 1671 and in the 3d vol. the following contents which are listed by Güntz, Handb. Landw. Litt. 3:25: (1) Olitorium, das ist Kraut-, kohl- oder kuchengarten oder das 3. buch der edlen gartenwissenschaft aus P. Laurembergii Horticultura... Nürnberg, 1673; (2) Phytiatricum, das ist Arzneikräutergarten oder das 4. buch der edlen gartenwissenschaft &c. (3) Mantissa seu jucundissimae considerationes historicae et physicae ad horticulturam spectantes; (4) Beschluss der Edlen gartenwissenschaft oder Ein angenehmes garten-memorial anno 1673; (5) Apparatus plantarum floriferarum specialis. Nürnberg, 1682, 3 pts.

Stromer's rendition of the Apparatus plantarum seems to have appeared first in this 1682 ed. Güntz, 3:25-26, also gives contents for the 3 parts of this work: Buch I. vom blumenwerk; II. von den blumengewächsen, so "ribichte, schwammichte oder knollichte wurzeln"; & III. von den übrigen blumengewächsen, so "mehrentheils zaserichte und fasichte wurzeln" haben.

Sweerts, Emanuel (b. 1552)

Florilegium ... tractans de variis floribus et aliis indicis platis ad vivum delineatum in duabus partibus et quatuor linguis concinnatum. Francofurti ad Moenum, impressum apud Anthonium Kempner sumptibus auctoris, 1612. 2 pts. in 1 v. 110 pl. F°. (Lib. Cong.; Arn. Arb.; Lloyd Lib.; Mo. Bot. Gard.; Brit. Mus.; Kew; Lindley; Wageningen)

^ Brit. Mus. Nat. Hist. also has v.1, 1612.

----- Francofurti, A. Kempner, 1615, '14. 2 pts. in 1 v. 110 pl. F°. (Arn. Arb.; Brit. Mus.)

Arn. Arb. has another copy of v.2, 1614, with its v.1, 1612. Brit. Mus. Nat. Hist. has a copy of v.2, 1614, with its v.1, 1612. Arn. Arb. Cat. says the title of v.1, 1615, also bears the date 1612. See also Quaritch, Cat. 400:115 (no.1737)

----- Amstelodami, apud Johannem Janssonium, 1620. 2 pts in 1 v. 110 pl. F°. (Kew)

The addition of 1620, given by Pritzel, 2d ed., no.9073, as the actual 2d ed. of the work, is also given by Graesse, 6(1):534, but not mentioned by Brunet, 4:281, who notes only the 1st ed., 1612, and those of 1631 and 1647. There do not appear to be many copies with 1620 in both parts. Arn. Arb. has v.1, 1620, together with v.2, 1614.

----- Amstelodami, 1631. 2 pts. in 1 v. 110 pl. F°. (Arn. Arb.; Mass. Hort. Soc.; Brit. Mus. Nat. Hist.)

Quaritch, Cat. 400:115 (item 1738), gives ed. of Amsterdam, 1631, as by J. Jansson, while the Internationaal Antiquariaat Cat. 80, item 567, gives Fred. de Wit as publisher, but gives the date 1631 in parentheses. The latter may correspond to item 1739 advertised by Quaritch, l.c., giving F. de Wit as publisher, but no date. It might be inferred from these two items in Quaritch Cat. 400 that the issue of F. de Wit was subsequent to that of Jansson. (MFW)

Arn. Arb. and Brit. Mus. both have copies of v.2, 1631, with v.1, 1647; while Wageningen has v.2, 1631, with its v.1 of the 1641 ed.

Sweerts, Emanuel. (cont.)

----- Amstelodami, 1641. 2 pts. in 1 v. 110 pl.
F°. (Lindley)

Bull. Cat. Bib. Landb. Hooges. Wageningen,
Ser. IV, no.11 (1930), no.23127, describes this
as 2 pts in 1 v., 1631-1641; but its copy con-
sists of v.1, 1641, together with v.2, 1631.

----- Amstelodami, 1647. 2 pts. 110 pl. F°. (Lloyd Lib.; Linn. Soc. London)

This is one of the issues mentioned by both
Brunet, 4:281, and Graesse, 6(1):534, but there
are few copies with the same date in both parts.
Arn. Arb. and Brit. Mus. both have copies with
v.1, 1647, and v.2, 1631; while Mo. Bot. Gard.
copy has v.2 of the 1654 issue with v.1, 1647.

----- Amstelodami, 1655,'54. 2 pts. 110 pl. F°. (Arn. Arb.)

The Mo. Bot. Gard. has pt.2, 1654, with its
1647 ed. of pt.1.

Swinden, N. (Gardener and seedsman at Brentford-End, Middlesex)

The beauties of flora displayed; or, Gentleman and la-
dy's pocket companion to the flower and kitchen garden: on
an entire new plan: with a catalogue of seeds necessary
for each of them. By N. Swinden, gardener and seedsman at
Brentford-End. London, Dodsley, &c., 1778. 86 p.
(Brit. Mus.; Linn. Soc. London)

"The chief peculiarity of this little manual
of horticulture consists in the description of
the heights and colours of about 200 different
flowers, with particular directions for sowing,
managing and arranging them, so as to have those
of nearly equal heights by themselves, and that
no two flowers of the same colour be seen to-
gether; nor that any one kind should be hidden
by the other ... The designs are illustrated by
seven copper-plates, exhibiting the nature and
effect of the several arrangements, by the posi-
tions of the flowers, &c. when growing." --
Monthly Review 58:319-320. 1778.

Given by Pritzel, 1st ed., and Johnson, p.238.

Switzer, Stephen, 1682?-1745.

A compendious, but more particular method, than has ever yet been published, for the raising Italian brocoli, Spanish cardoon, celeriac, fenochi, and other foreign kitchen vegetables; so as to make them dishes more generally used than hitherto they have been. As also a more authentick account of the la lucerne, St. Foyne, clover, and other grass seeds, for the improvement of land, than is at present to be found in any books of husbandry, or gardening ... To which is added, the new, but very useful method of burning of clay, for the improvement of land ... As also, an appendix, wherein is contained a further and full account of the la lucerne ... By S. S. author of the Practical fruit and kitchen gardener, &c. London, Printed by S. A. and sold by T. Astley [etc., 1728?] xvi, 46 p. (Dept. Agr.)

There is some uncertainty about the date of this 1st ed. No date appears on the t.-p. of the Dept. Agr. copy, which was offered by Wheldon & Wesley, Cat. 2 (1921), no.990, with the date 1727 supplied; but the text (p.5) mentions the author's "Practical Kitchen Gardiner" (1727) as "sometime since published." Although there is no break in the numbering of the pages of the preface and contents, the preface stops abruptly in the middle of a sentence, making one wonder whether more might have been intended, including a date. There may have been an earlier issue than the Dept. Agr. copy since its Appendix refers to those gentlemen who may have bought the book before the Appendix came out. The first nine paragraphs of this earlier preface, however, make up the preface of the 6th ed., 1735, which is dated April, 1728. Moreover, Johnson, p.182, and the Dict. Nat. Biog., 55:242, both give 1728 as date of 1st ed. R.P. Brotherston, writing in Gard. Chron. III, 58:186-187 (1915), evidently accepts that year, as he speaks of Switzer's having established himself in 1728 as a seedsman in Westminster Hall, of his having produced "The Practical Kitchen Gardiner" in the previous year, and of his issuing a pamphlet [A compendious, but more particular method] as an appendix to this volume "after starting business." The practical husbandman and planter or observations on the ancient and modern husbandry, gardening &c. London, 1727, 1733. 2 v. (Haller, Bib. Bot. 2:149)

Haller says this came out in monthly issues, but he had only six of them. In a lengthy note, he mentions some of the contents of January and June. It thus appears that this was a veritable publication, altho its title may have been garbled, and it may also have contained articles by other persons besides Switzer. (MFW)

The practical kitchen gardiner: or, A new and entire system of directions for his employment in the melonry, kitchen-garden, and potagery, in the several seasons of the year ... To which is added, by way of supplement, the method of raising cucumbers and melons, mushrooms, borecole, broccoli, potatoes, and other curious and useful plants, as practiced in France, Italy, Holland and Ireland.
